# ADMISSION BROCHURE 2021

**Jaypee Higher Education System  
Building Intellectual Capital**

### **Jaiprakash Gaur**

Founder Chancellor of JIIT  
and Founder Chairman, Jaypee Group

## **Founder Chairman's Message**

Long before OUR first dam and years before OUR first cement plant, we built a free school and hospital. Today they tell US, what we did, is called Corporate Social Responsibility; CSR Spirit of Jaypee GROUP

The Jaypee Group has always been proud to participate in nation building right from its inception. We feel doubly responsible to make this Group to become a benchmark of contribution to the upliftment of society. CSR has become an integral part of everything that we do and same is instilled in our vision, strategies and management goals.

JAIPRAKASH SEWA SANSTHAN (JSS), a not-for-profit trust, was established in 1993 to bring many not-for-profit activities of the Group under one common umbrella, in order to give them a unified focus and direction. The Sansthan today spearheads one of the largest altruistic CSR programmes run by any single-entity corporate anywhere in the country.

Firmly believing in the famous saying of Nelson Mandela "Education is the most powerful weapon which can be used to change the world", we at Jaypee fully subscribe to the view that Education is the cornerstone to economic development and that the strength of Indian masses can

be channelized by education alone. The real future of India lies in its thousands of faceless little towns and villages, where millions of boys and girls lie awake at night, dreaming of what could be. And we also believe that the key to unlock those dreams and help them soar is good education. Therefore, the Jaypee Group, through its trust, has opened large number of schools, polytechnic colleges and institutes of higher learning, teaching over 30,000 students under its wings. These institutions of learning host the best of faculty and educational infrastructure towards creation, generation, dissemination and application of knowledge through an innovative teaching - learning process to mould the leaders of tomorrow.

All the institutions of higher learning aim at building character sharpen intellect and enable free thinking amongst the students and provide them opportunity to become innovative and enterprising professionals, fully capable of meeting the challenges of modern India.

**JAYPEE GROUP**  
CORPORATE SOCIAL RESPONSIBILITY

# Jaypee Institute of Information Technology (JIIT), Noida, U.P

(Approved by UGC as Deemed-to-be-University under section 3 of UGC Act 1956)

AICTE approved, NAAC accredited and NIRF ranked, Jaypee Institute of Information Technology (JIIT), Noida, set up in 2001, was conferred the status of a Deemed to be University in 2004, and since then, has evolved into a centre of excellence in the field of Computer Science & Engineering, Information Technology, Electronics and Communication Engineering, Biotechnology, Management and related emerging areas of education, training and research. Replete with a challenging and intellectually stimulating academic environment, JIIT has a vision of producing professionals who shall be leaders in innovation, entrepreneurship, creativity and management.

JIIT attracts the brightest and the best students regardless of their Social, Educational, Regional or Ethnic background. Students imbibe top rated education and enjoy a campus culture of unparalleled depth and diversity. JIIT ensures that students with the potential flourish and develop into top professionals and contribute in development of nation.

At JIIT, special emphasis is being placed on developing a student on a solid foundation of knowledge, confidence building, pursuit of excellence, improving self-discipline and enhancement of creativity through motivation and drive into an engineer, well trained for the rigors of professional and social life.

JIIT encourages all students to make the life outside the classroom vibrant and enjoyable by engaging themselves in multiple extracurricular areas, no matter how talented or experienced they are in any of those areas. This is enhanced by best of facilities provided to make life outside the classroom an exciting and memorable experience.

JIIT is a fully air-conditioned campus, has an unparalleled State-of-the-art, high-tech and environmentally conditioned infrastructure with a built up area of over 141610 sq.m with residential campus, Academic Block comprising Lecture Theaters, Smart Classrooms, Labs, Learning Resource Centres with rich resources of print books, e-books and e- journals, Faculty Residences, Student Hostels, Annapurna, 2500 capacity Auditorium, advanced Audio Visual facility and high capacity internet connectivity.

## Programs of Study

### Undergraduate (4 Years)

B.Tech.

- Biotechnology (BT)
- Computer Science and Engineering (CSE)
- Electronics and Communication Engineering (ECE)
- Information Technology (IT)

### Undergraduate (3 Years)

BBA at Jaypee Business School

### Integrated M.Tech. (5 Years)

- Biotechnology (BT)
- Computer Science and Engineering (CSE)
- Electronics and Communication Engineering (ECE)

### Post Graduate (2 Years)

M.Tech.

- Biotechnology(BT)
- Computer Science & Engineering (CSE)
- CSE with specialization in
  - ✓ Data Analytics
  - ✓ IT & Entrepreneurship
  - ✓ Artificial Intelligence and Machine Learning
  - ✓ Internet of Things
- ECE with specialization in
  - ✓ Machine Learning and Signal Processing
  - ✓ Wireless Communication
  - ✓ Microelectronic Systems and Internet of Things

M.Sc

- Physics
- Mathematics
- Microbiology
- Environmental Biotechnology
- Economics

### MBA (2 Years) at Jaypee Business School

The two year full time program at JBS covers various areas of business such as accounting, applied statistics, business communication, IT applications, business ethics, business law, finance, economics, human resource management, marketing, business analytics, supply chain and operations in a manner most relevant for contemporary business practices and strategy.

### Ph.D

- Biotechnology
- Computer Science & Engineering,
- Electronics & Communication Engineering,
- Humanities & Social Sciences,
- Management
- Mathematics
- Physics and Materials Science and Engineering

## Minor Specialization

JIIT, Noida offers opportunity to B.Tech students to opt for Minor Specialization in the areas other than their main branch. The students, after successfully completing the requirements, will be awarded an additional certificate of Minor Area e.g, a student of B.Tech in Electronics and Communication Engineering can have Minor Specialization in Computer Science and Engineering or Biotechnology etc.

The Condition for award of Minor Additional Certificate of Minor Area are to secure a minimum CGPA of 4.5 and earning the required credit specified for the program of a particular batch and to complete the degree in its minimum period. In addition to above, the student will have to earn additional 20 credits in the minor area.

MAIN BRANCH	AREA OF MINOR SPECIALIZATION
CSE	ECE/BT
ECE	CSE/BT/IT
BT	CSE/IT/ECE
IT	ECE/BT

## Proficiency Certificate

A B.Tech. Student can get additional certificate of proficiency in a sub-area of specialization of major degree. The conditions for award of certificate of proficiency, is to complete the B.Tech Degree in its minimum period with CGPA of more than 6.5 and have passed in minimum of 50% or more of B.Tech elective subjects taken from the chosen area. The Grade Point Average in the elective subjects from the chosen area should be more than 7.0 and Major Project needs to be done from the chosen stream with at least "A" Grade. The details are available on website of JIIT, Noida.

## Honours Degree

JIIT, Noida provides B.Tech Degree with Honours to its students who secures a CGPA of 8.0 and above after earning the specified credits for their batch of admission by successfully completing all the requirement of the degree within the minimum period of the program.

## Significant Achievements/Highlights - JIIT

- NIRF (MHRD) All India Rankings :  
2016 - Ranked 60th at the national level amongst all the Govt. and private Engineering institutions.  
2017 – Ranked 54th in Engineering Category.  
2018 – Ranked 70th in Engineering Category.  
2019 – Ranked 80th in Engineering category.  
2020 – Ranked 96th in Engineering category
- Accredited by NAAC in November 2015 for 5 years.
- AICTE approved institution since 2018.
- Highly experienced faculty members. Majority from IIT's and other Institutions/ Universities of repute.
- MoUs with Foreign Universities for student/faculty exchange and collaborative research.
- 14543 alumni including 230 Doctoral, 10870 B.Tech, 1365 M.Tech (including Dual/ Integrated Degree) and 1601 MBAs.
- Organized 41 International conferences, about 300 invited talks, and 110 workshops and seminars with 6500 delegates from India and abroad during last 7 years. Organized more than 50 Webinars during last 1 year.
- Contributed 4470 Research Papers in International and National Journals/ Conference, 33 Books and 194 Book Chapters, 52 Case studies.
- 43 Research Projects worth Rs. 927.28 Lacs completed and 13 Research Projects worth Rs. 407.65 Lacs currently running. Projects sanctioned from Government Agencies like DRDO, DST, AICTE, DBT, AYUSH etc.
- Option of VIII Semester Studies at University of Florida at Gainesville for selected UG students.
- Credited with 7 Patents filed, 6 patents published, 1 patent granted and 1 technology transfer.
- 101 Classrooms, 108 Laboratories, 2 Auditoriums, Administrative Offices, Outdoor and Indoor sports facilities, Dispensary, 3 Swimming pools, 11 hostels accommodating 1633 boys and 914 girls in double occupancy, Vice-Chancellor, Director, Faculty and Staff residences.
- 273 faculty members, 75% with PhD and 100% with PG Degrees.
- About 30 National and International awards for research, received by faculty and students of the Institute.
- 226 PhD produced since 2008-09.
- 2020 pass-out B. Tech, M. Tech & Dual students placed in 193 companies with 161% offers and 97% absolute placements. 2020 pass-out MBA students placed in 61 companies with 98% offers.

- The highest salary package offered, till now for 2021 batch, is INR 30 LPA to 10 students by Amazon. Morgan Stanley has offered a salary package of INR 25 LPA to 5 students. Companies like Google, Morgan Stanley, Deloitte, Nestle, SAP Labs, Intuit, BNY Mellon, ZS Associates visited the campus for 2021 batch and recruited students. During the current placement season, 39 other companies have offered salary package of INR 6 LPA & above to 332 students.
- Participates in Smart India Hackathon, MHRD, GOI. In 2019, 4 teams won first prize and 1 team was 1st Runner-up at All India level.
- Participates in Unnat Bharat Abhiyan(UBA) of MHRD, GOI. Five villages adopted under UBA for their development.
- Options available for credits completion through MOOC courses available from NPTEL and SWAYAM, MHRD,GOI.
- Students documents deposited in National Academic Depository (NAD).
- Participation in Swachch Bharat Abhiyan of GOI.
- Has Institution Innovation Council (IIC) to promote Innovation and Entrepreneurship among students and linked to MHRD's Innovation Cell, GOI.
- Participates in Study in India Program of MHRD, GOI for admissions of foreign students, which is available to the NIRF ranked Institutions.
- Has National Service Scheme(NSS) of GOI for students.
- Participates in Atal Ranking of Institutions on Innovation Achievements (ARIIA), an initiative by MHRD's Innovation Cell, GOI.

# Jaypee University of Information Technology (JUIT), Wagnaghat, H.P

(Approved by UGC under Section 2(f) of UGC Act 1956)

Twice NAAC accredited, Biotechnology Course NBA Accredited, NIRF ranked, Jaypee University of Information Technology, Wagnaghat, H.P, was set up in 2002, and conferred the status of State Private University by Act No. 14 of 2002 vide Extraordinary Gazette notification of Government of Himachal Pradesh dated May 23, 2002. Spread over 25 acres of lush green picturesque slopes of Wagnaghat, in District Solan of Himachal Pradesh, covering a total built up area of over 73864.81 sq.m. comprising Academic Block (with lecture theatres, classrooms, tutorial rooms, laboratories, administrative and faculty offices, and library), hostels for both boys and girls, faculty residences, Guest House, Students Mess, Auditorium, sports facilities, Laundry, Dispensary and other associated services.

At present, around 82% students (boys and girls) alongwith 60% faculty members reside in campus. Internet connectivity is available to all faculty & students.

The University encourages all students to make life outside the classroom vibrant and enjoyable by engaging in multifarious extracurricular activities. This is enhanced by best of facilities and equipment.

It is fully wifi campus supplemented with fibre-optic network connecting its labs, classrooms, library, and hostels. The computing infrastructure consists of state-of-the-art multi processor servers accessed by an array of multimedia desktops.

All the lecture theatres/classrooms have multimedia projection systems for facilitating computer-based and web-based learning. The University has 60 well equipped labs in various disciplines. There is a language laboratory to assist students enhance their communication skills. The JUIT has recently equipped its classrooms with Digital Infrastructure and has procured Google G-Suite for online teaching.

## Programs of Study

### Undergraduate (4 Years)

#### B.Tech.

- Bioinformatics (BI)
- Biotechnology (BT)
- Civil Engineering (CE)
- Computer Science and Engineering (CSE)
- Electronics and Communication Engineering (ECE)
- Electronics & Computers Engineering (ECM)
- Information Technology (IT)

### Post Graduate (2 Years)

#### M.Tech.

- Biotechnology (BT)
- Biotechnology with Specialization in
  - ✓ Industrial Biotechnology
  - ✓ Medical Biotechnology
- Civil Engineering with specialization in -
  - ✓ Construction Management (CM)
  - ✓ Environmental Engineering (EE)
  - ✓ Structural Engineering (SE)
- Computer Science and Engineering (CSE)
- Computer Science and Engineering with specialization in
  - ✓ Information Security)
  - ✓ Data Science
- Electronics and Communication Engineering (ECE)
- Electronics and Communication Engineering with specialization in
  - ✓ Internet of Things

#### M.Sc

- Microbiology(MB)
- Biotechnology (BT)

#### Note :

1. In M. Sc. (Biotechnology) 10 seats out of total 30 are DBT (Gol) supported.
2. For Course Structures of above programs refer [www.juit.ac.in](http://www.juit.ac.in)

### Ph.D

Bioinformatics, Biotechnology, Civil Engineering, Computer Science and Engineering, Electronics and Communication Engineering, Humanities & Social Sciences, Mathematics, Physics and Materials Science.

## Minor Specialization

JUIT, Wagnaghat offers opportunity to B.Tech students to opt for Minor Specialization in the areas other than their main branch. The students, after successfully completing the requirements, will be awarded an additional certificate of Minor Area e.g, a student of B.Tech in Civil Engineering can have Minor Specialization in Computer Science and Engineering or Biotechnology or Electronics and Communication Engineering etc.

Students looking for minor specialization has to earn 20 additional credits in area of specialization within a minimum period of 04 years alongwith other requirements of completion of Degree.

MAIN BRANCH	AREA OF MINOR SPECIALIZATION
CSE	ECE / BT/CE/BI/ECM
IT	ECE / BT/CE/BI/ECM
ECE	CSE/BT/IT/CE/BI/ECM
BT/BI	CSE/IT/ECE/CE/ECM
CE	CSE/IT/ECE/BT/BI/ECM

## Proficiency Certificate

A B.Tech. Student can get additional certificate of proficiency in a sub-area of specialization of major degree The conditions for award of certificate of proficiency, is to complete the B.Tech Degree in its minimum period with CGPA of more than 6.5 and have passed in minimum of 50% or more of B.Tech elective subjects taken from the chosen area. The Grade Point Average in the elective subjects from the chosen area should be more than 7.0 and Major Project needs to be done from the chosen stream with at least "A" Grade. The details are available on website of JUIT, Wagnaghat.

## Honours Degree

JUIT, Wagnaghat provides B.Tech Degree with Honours to its students who secure a CGPA of 8.0 and above after earning the specified credits for their batch of admission and successfully completing all the requirement of the degree within the minimum period of the program with discipline grade A+ throughout the course of study.

## Significant Achievements/Highlights - JUIT

- Accredited by NAAC twice (2011 & 2017), UG program of study in Biotechnology accredited by NBA.
- Ranked amongst Top Engineering Institutes under National Institutional Ranking Framework (NIRF) by MHRD, Govt for last five consecutive years.
- India Today ranked JUIT 20th in India's Best Technical Universities.
- JUIT Ranked 1st in Private Universities in HP by Dialogue India – 2019 and ranked 14th in Top Private University in India by Outlook.
- Excellent placement record in all programs. See section on Placement.
- 8th Semester Studies at University of Florida, USA, TAMK Finland, South Dakota School of Mines & Technology, USA & University of Nebraska at Omaha, USA for selected UG students.
- NCC Senior Wing for Boys and Girls.
- 84 percent faculty with Ph.Ds from IITs / Universities of repute in India & Abroad.
- Green and Smart Campus infrastructure architecturally designed by M/s Arcorp, Canada. Wifi with 24x7 Water and Electric Supply.
- Contributed more than 3277 Research Publications, 81 Books and 229 Book Chapters.
- Organized 23 International Conferences, 204 invited talks, 77 national workshops with around 5720 delegates from India and abroad.
- Received 85 research grants from various Government Agencies.
- 30 percent Tuition Fees concession to Wards of serving and retired Armed Forces and Paramilitary Forces personnel for Undergraduate programs. Additional 5 percent (35%) for Wards of War Widows. 10 percent seats reserved for such categories.
- 10 percent seats reserved for students who have passed 12th from State of Himachal Pradesh.
- 20% seats over and above the intake for direct admission to B. Tech. 2nd year under Lateral Entry scheme.

# Jaypee University of Engineering and Technology (JUET), Guna, M.P.

(Grade 'A' Accredited by NAAC and approved by UGC under Section 2 (f) of UGC Act 1956)

Jaypee University of Engineering & Technology, Guna has been established vide Government of Madhya Pradesh Gazette extra ordinary No.3 of 2010 dated 29th April 2010 as a private university in the State of MP under the provisions of MP Niji Vishwavidyalaya Adhiniyam 2007. The university has been notified by the UGC under section 2(f) of the UGC Act, 1956 and Accredited by NAAC with Grade "A" in very first cycle of Accreditation in 2016.

University's location at Raghogarh, in Guna District, is a well thought out vision to serve the central districts of MP such as Shivpuri, Gwalior, Sheopur, Ashok Nagar, Sagar, Rajgarh, Vidisha etc. This region, currently in a rural setting with strong agricultural activities is growing as a major eco-industrial hub specially due to recently constructed four-lane highway on old Agra Mumbai Road. JUET is being developed as a major center to provide competent, well trained technical manpower to the region.

The University campus sprawls over 122.5 acres as a modern institution of higher learning in the field of engineering and technical education.

The academic activities started in the year 2003. Presently, the university offers programs of three faculties named as Faculty of Engineering, Faculty of Mathematical Sciences and Faculty of Sciences. Its young alumni have made a mark all over the world in diverse spheres.

The University has a modern well laid out and green campus with fully equipped state-of-the-art laboratories and library, which provides a pleasant and intellectually stimulating ambience for students in eco-friendly environment. Special emphasis has been laid on developing an atmosphere highly conducive for

- Building of a solid foundation of knowledge
- Confidence building
- Pursuit of excellence and self discipline
- Personality development
- Inculcation of creativity through motivation and drive, which helps to produce innovative professionals well equipped for the rigors of emerging challenges of professional and social life.

The University offers the complete educational spectrum of programs in emerging technologies at the degree levels. Research in emerging areas of technology is a major thrust and is leveraged for all academic pursuits.

## Programs of Study

### Undergraduate (4 Years)

#### B.Tech.

- Chemical Engineering
- Civil Engineering
- Computer Science & Engineering
- Electronics & Communication Engineering
- Mechanical Engineering

Specializations are being offered in B.Tech. Programs.

#### Ph.D

Chemical Engineering, Civil Engineering, Computer Science & Engineering, Electronics & Communication Engineering, Mechanical Engineering, Mathematics, Physics and Humanities & Social Sciences.

## Minor Specialization

JUET, Guna offers opportunity to B.Tech students to opt for Minor Specialization in the areas. The students, after successfully completing the requirements, will be awarded an additional certificate of Minor Area

The Condition for award of Minor Specialization are to secure a minimum CGPA of 4.5 and earning the required credit specified for the program of a particular batch and to complete the degree in its minimum period. In addition to above, the student will have to earn additional 20 credits in the area of specialization.

For details visit <https://www.juet.ac.in/Course/Specialization.php>

## Honours Degree

JUET, Guna provides B.Tech Degree with Honours as per University rules.

## Significant Achievements/Highlights - JUET

- Grade 'A' accredited by NAAC for 5 years from 5.11.2016 and received their special appreciation for carbon positive campus.
- Ranked 151-200 Band 2018 in Universities in India by National Institutional Ranking Framework (NIRF) of Ministry of HRD, Govt. of India.
- Recognized Social Entrepreneurship, Swachhta & Rural Engagement Cell (SES REC) Institution.
- Best Accredited Student Branch Award by Computer Society of India (CSI) in 2017.
- Ranked 20 based on Codechef coding platform performance by (<https://codechef.prakhar.info/codechef/institute>) as on December 2020.
- Experienced faculty with more than 12 years academic experience on average.
- Last Semester Studies at University of Florida for selected students.
- 5041 Alumni including 80 Doctoral, 208 M. Tech., 6 B.Sc. (Honors) and 4747 B.Tech.
- 11 National/International Conferences, 31 National/International workshops, 23 Short Term Courses, around 2500 delegates attended, 185 invited talks delivered by experts from around the world and 10 FDPs Organized.
- More than 1322 Research Publications, 53 Books and Book Chapters.
- Research Grants from various government agencies.
- MOU with CSIR through CBRI, Roorkee.
- MOU with MNNIT Allahabad.
- Prof. Carsten Mueller of Germany is a visiting Professor at the university and conducts one elective course in CSE every year.
- Completely networked campus with NKN (National Knowledge Network), BSNL, Airtel and Reliance JIO.
- Successful placement of graduating students (Offer wise more than 100%) every year in reputed organizations such as Amazon, Grab, Infosys, Cognizant, Wipro, SAP Labs, Oracle, IBM, Dell, NEC, Ericsson, Ernst & Young, S&P Capital IQ, Aricent, Johnson Controls (India) Pvt. Ltd., Kuliza Technologies, Naukri.com, Syntel, CSC India Pvt. Ltd., HCL Technologies, Tech Mahindra, Adani Wilmer, Liugong, Sanghi Cement, Shree Cement, UltraTech, Continental Automotives, Browser Stack, Minzar, NIRMA Group, JK Cement, Ambuja Cement, Wonder Cement, Mangalam Cement Ltd, JMC, Bosch, L&T, Bridgecon Infra, Supertech, Shobha Developers, DBL, APAC Sourcing Solutions Ltd., Kalpataru, Various companies of Jaypee Group and others. Highest Package Offered: - Rs. 41 Lac per annum in 2020 by Shopee-Airpay.

# Jaypee University Anoopshahr, Bulandshahr, U.P.

(Established by Government of Uttar Pradesh under Private Universities Act No. 8 of 2014)

Jaypee University at Anoopshahr is an Interdisciplinary University established by the act No. 8 of 2014 of Govt. of UP. As per sanction of the Govt. of Uttar Pradesh, received vide its Letter No. 347/ Sattar-1-2014-20(4)/2011. The University started functioning in 2014 with B. Tech. programs in five disciplines. It is located in the hinterland of Uttar Pradesh in serene and pious environment on the banks of holy river Ganges. It is sponsored by Jaiprakash Sewa Sansthan (JSS), a not-for-profit-trust. Jaypee University, Anoopshahr is shaping students with holistic approach in achieving their lifelong objectives and attempting to produce not only literate and educated manpower, but also personalities with ethical and moral values to serve the society in true spirit.

## Significant Achievements/Highlights - JUA

- A new generation Interdisciplinary University aiming to produce quality professionals capable of meeting global challenges.
- Set-up in about 100 acres of lush green environment on the banks of Holy River Ganges, providing serenity and intellectually stimulating environment.
- Shares academic synergy, experience, cooperation and support of the existing Jaypee Universities: JIIT - Noida, JUIT -Waknaghat and JUET - Guna.
- Fully equipped, updated and operational infrastructure.

## Programs of Study

### Undergraduate (4 Years)

B.Tech.

- Computer Science & Engineering (CSE)
- Electronics & Communication Engineering (ECE)
- Information Technology (IT)
- Civil Engineering (CE)
- Mechanical Engineering (ME)

### Undergraduate (3 Years)

B.Sc. (Hons)

- Mathematics (MA)
- Physics (PH)
- Electronics (EX)
- Computer Science (CS)
- Information Science (IS)

B.A.

B.A. in Journalism and Mass Communication

B.A. (Honours) in Economics

B.Com. (Honours)

B.B.A. (Agricultural Business, Digital Marketing, Healthcare Management, Hospitality Management)

- Key infrastructure and resources include well qualified and experienced faculty, fully equipped labs, well stocked library, separate hostel for boys and girls, fully networked campus, facilities for games and associated utilities for students comfort and providing excellent environment for teaching learning process.
- Existing Training and Placement (T&P) unit of Jaypee Universities facilitates placements.
- Well connected by road from Aligarh, Moradabad, Sambhal, Badaun, Meerut, Ghaziabad, Noida /Delhi.

# UG Programs 2021-22

Program/Total No. of Seats	JIIT-Noida (Sec. 62 & 128)	JUIT – Wagnaghat, H.P.	JUET – Guna, M.P.
	1320	570	600
B.Tech Disciplines offered (Seats)	CSE (540) ECE(480) IT(60) BT (60)	BT (30) CE (60) CSE (330) ECE (30) IT (60) BI (30) ECM (30)	CSE (390) ECE (60) CE (60) CHE (30) ME (60)
Integrated M.Tech	CSE (30) ECE (30) BT (30)	-	-
B.B.A	180	-	-
B.Sc (Hons)	-	-	Mathematics (10) Physics(10) Chemistry (10)

## Minor Specialization:

A B.Tech student can have minor specialization alongwith the major specialization, if the student completes additional 20 credits. These could also be acquired through MOOC., For ex. A student of ECE can have minor specialization in CSE or BT.

## Proficiency Certification:

Proficiency certificate is given in niche areas of high importance in present time/future by opting for electives in that area. Areas, for ex., specializations like Artificial Intelligence (AI), Internet of Things(IOT), Data Analytics(DA), Machine Learning (ML), Cloud Computing (CC) etc.

# UG Programs

## Computer Science and Engineering (JIIT, JUIT & JUET) & Information Technology (JIIT & JUIT)

Departments of Computer Science and Engineering & Information Technology offer two UG programs, namely B.Tech. in Computer Science & Engineering and B.Tech. in Information Technology.

The UG curriculum of CSE & IT ,standing on elements of research and design, is updated on regular basis to include areas of current relevance in the field of computer science & IT. Currently, compelling areas like Data Analytics, Cloud ,Fog and Edge Computing, Big Data Technologies, Cyber Security, Internet of Things, Artificial Intelligence and Machine Learning, Block chain and latest development in software processes like Dev Ops and Kubernetes, are part of one or more subjects in the curricula.

Large number of electives offers to a student to choose subjects according to their interests and future plans. Core and choice based interdisciplinary electives in almost every semester provide avenues to understand the way computer science can benefit from other disciplines and vice-versa. Besides regular credit based subjects, students can earn a certificate of proficiency through value added courses and workshops for reinforced learning in the areas of importance.

Teaching pedagogy lays heavy emphasis on programming skills nurtured through contemporarily designed laboratory courses and minor / major projects. Learning in practical subjects is facilitated by well equipped laboratories while being continuously supported by faculty members, Ph.D. and M.Tech.(Teaching Associates) as well as fourth year B.Tech students as mentors.

There are more than 100 faculty members in the department and most of them are doctorate in the emerging areas of computer science and IT. Department has strong programming culture, and thus students are not performing at only national level, but at international level also at various worldclass programming platforms like codechef, GSoc internships and many more.

Department regularly organizes co-curricular technical activities like online programming competitions, hackathons, Robotics hub, Google Developer Group workshops and graphic designing workshops etc. This gives CSE & IT students an edge over other undergraduates and post graduates. IT Giants like Amazon, Adobe, Google, D.E.Shaw, Morgan Stanley, Deloitte, SAP & many others are regular recruiters. It's worth mentioning here that the number of companies offering package more than INR 10 Lac per annum (LPA) are increasing every years & in 2020 only, total 105 students

of CSE & IT bagged 7 digit package offered by more than 30 companies. On an average, approximately 130 companies visit JIIT to recruit IT professionals every year.

This year, the highest package offered was as high as INR 43.17 LPA by Adobe to 4 CSE & IT students, followed by 34 LPA offer by D.E. Shaw to 7 students, 28 LPA offer by Amazon to 32 students, 25 LPA offer by Morgan Stanley to 6 students & so on. Average package offered to CSE students was 8.7 LPA with median 6.0 LPA and to IT students, average was 9.4 LPA with median 7.5 LPA. Apart from strong industry driven curricula, department has strong research environment also. Currently more than 125 research scholars are pursuing Ph.D., in the department on various areas like Blockchain, IoT, Quantum computing, AI & ML, Data science etc.

CSE & IT UG students can earn a Minor degree in ECE or in Biotechnology, if they take 20 credits in addition to their regular CSE & IT credits. There is also a provision on earning a proficiency area certificates. IT helps students to become more employable in the industry. There are total eight departmental electives in the UG curriculum. If a student takes more than 5 electives of certain area, along with major and minor projects in that area, and earns a good grade, he/she will be awarded an additional certificate of proficiency in that area. Currently department has provision to offer 8 certificate of proficiency area, viz., Blockchain, Data Analytics and Science, Artificial Intelligence and Machine learning, Internet of Things ( IoT) etc.

Students are provided ample opportunities to develop and demonstrate their innovation and design skills through co-curricular technical activities like online programming competitions, hackathons, Robotics hub, Google Developer Group

workshops and graphic designing interest group among others. As a result of all these exposures, student projects quite often lead to research publications in leading journals and conferences.

Some of the core subjects of the programs include Object Oriented Programming, Computer Organization and Architecture, Smart Systems, Micro processors & Controllers, Algorithms, Operating Systems, Software Engineering, Computation Theory, Computer Networks and Compiler Design. Students have to undergo a thorough six-week mandatory industrial training at the end of their third year of study to get a feel of the work culture in relevant industries.

It's the result of all these concerted efforts that the placement statistics are very enthusiastic and eligible students get job offers through campus placement.

## Electronics and Communication Engineering (JIIT, JUIT & JUET)

"The latest technology today is an obsolete technology tomorrow." The quote is apt and relevant as the world of technology in Electronics and Communication industry is changing very fast and has undergone tremendous transformation. The technology landscape in 21st century necessitates innovation and excellence. This, precisely, is what Departments of Electronics and Communication Engineering (ECE) is about. Electronics and Communication Engineering discipline spans a diverse set of intellectual subfields and applications. The subfields can be grouped into overlapping and interrelated areas like Signal and Image Processing, Semiconductor Device Design, Communication Systems, Data Communication Networks, Microwave and Antenna Design, Internet of Things, Wireless Communication, Microelectronics, Embedded Systems, VLSI Design, Machine Learning and many more. The students undertake courses in Basic Sciences, Mathematics, and Humanities as well. Also, two minor projects of duration of one semester and one major project of two semesters duration help the students in transforming their theoretical knowledge to practical applications.

Flexibility of opting for several elective subjects provide a wonderful opportunity to the students to broaden their knowledge and to obtain proficiency certificates in areas like IoT & AI, Wireless Communication, VLSI Circuits & Semiconductor Devices, Signal Processing and Machine Learning etc. Students can also opt for Minor specialization in other branches of Engineering like Computer Science and Engineering, Information Technology, Biotechnology etc. by opting for some extra credits.

The program is fully supported by excellent laboratories for all the core courses like Electrical Science, Communication systems, Digital Electronics, VLSI,

Electromagnetics, signal processing etc. and some advanced laboratories such as Machine Learning, IoT, Embedded systems and Robotics under e-Yantra sponsored by MHRD. These labs are equipped with state-of-the-art instruments and software tools to enable students to perform, simulation, fabrication and testing of their experiments and projects. Students can also participate in various technical activities through IEEE student chapter and can involve in Creativity and Innovation Cell (CICE) activities.

## Biotechnology (JIIT, JUIT)

The advent of 21st century witnessed the scope of biotechnology broaden with every passing year, with the realization of its potential to advance life and health for the best. The Indian Biotech industry, currently valued at \$64 bn, is expected to reach a massive \$150 bn target by 2024. To address the demands of the continuously evolving technology and industry, our curriculum is designed to prepare our students as prominent contributors to the field of Biotechnology (BT) and Bioinformatics (BI), imparting them with skill-sets that enable their adaptation to academia, research, and industry.

Realizing the interwoven nature of the field of Biotechnology, our curriculum is aimed to enhance the expertise of our students by rigorously indulging them in project based learning, aided by our available specialized labs and faculty mentoring in areas such as Proteomics & Genomics Technologies, Nanobiotechnology, Antimicrobial Resistance, Animal & Plant Cell Culture, Fermentation & Downstream Processing, Molecular Diagnostics, Disease & Healthcare, Pharmacogenomics, Biosensors, Bioeconomics and Waste Management. We further aim to develop and recognize student's proficiencies in the fields of Industrial Biotechnology, Medical Biotechnology, Plant and Microbial Biotechnology, Bioinformatics, Environmental Biotechnology and Food Biotechnology. Interaction with leading scientists from academia and industry through invited lectures, workshops and conferences ensures overall progress and enhancement of the student's technical skills.

The research emphasis is reflected by our active doctoral program, peer reviewed publications in international/national journals, and sponsored research projects from premier national funding agencies, namely, the Department of Biotechnology (DBT), the Department of Science and Technology (DST), All India Council for Technical Education (AICTE), Indian Council for Medical Research (ICMR), Council of Science and Technology, Uttar Pradesh (UPCST), Ministry of Environment GOI, Department of AYUSH etc.

## Civil Engineering (JUIT, JUET)

Undergraduate program in Civil Engineering (offered at JUIT-Waknaghat and JUET-Guna) has been developed to meet the latest requirements of the infrastructural development of our country in areas like Construction, Transportation, Hydropower and Environmental Engineering. The curriculum has been developed to keep it more practical and industry oriented without compromising on its academics rigour. Students are provided with comprehensive theoretical knowledge through lectures, tutorials and assignments covering the basic as well as advanced topics in various subjects of civil engineering. They are trained for practical understanding in departmental laboratories namely Concrete and Structural Engineering, Geotechnical Engineering, Environmental Engineering, Highway Engineering and Surveying, in addition to the traditional Engineering Graphics and Workshop Practices. All laboratories are equipped with modern equipments and facilities highly trained manpower. Students are exposed to construction industry during the practical training in reputed construction companies.

Training on software like STAAD Pro, MATLAB, Auto-CAD and PRIMAVIRA enhances employability of students in the various fields of Civil Engineering. Opportunities are provided to students for post graduation and research in the areas of Geotechnical, Structural, Environmental and Transportation Engineering.

## Bioinformatics (JUIT)

Bioinformatics has emerged as a separate discipline due to an upsurge in genomics data through sequencing of whole genomes of microbes, plants, animals and humans. Anticipating a high demand of technocrats with knowledge base of a combination of biotechnology and CS & IT, a specialized degree program B.Tech. Bioinformatics (BI) is offered. The multidisciplinary nature of Bioinformatics involves in-depth knowledge in Biotechnology, Computer Science and Engineering & IT, Mathematics, Biostatistics, Physics, in addition to core subjects such as Pharmacogenomics, System Biology and Neural Networks, Comparative and Functional Genomics, Clinical Trials, and Machine Learning Tools in Bioinformatics.

## Chemical Engineering (JUET)

The objectives of the program are to provide the students a broad-based education with emphasis on theory and practice of Chemical Engineering keeping in view the current and future requirements of the country. The courses offered, aim at preparing

trained manpower to meet the demand in the process industries including cement, food processing, petroleum processing, pharmaceuticals, mineral processing and polymers besides design, development & troubleshooting. Graduates have been placed successfully in reputed organizations like NOCIL, Hindustan Lever, Jaypee Group, IOCL, Reliance, DMCC, KJS Cement, APAC Consulting etc.

Nine fully equipped state-of-the-art laboratories with air/water/steam lines are available to students. The course syllabus is flexible and includes all components of modern engineering education with wide choice of electives from areas like design, analysis, modelling, energy and environment.

## Electronics and Computers Engineering (JUIT)

Department of Electronics and Communication is introduced with an increasing demand for engineers with good programming skills, new developments in the industry and increased use of new technologies such as Artificial Intelligence, Machine Learning, Internet of Things, Embedded Systems and Robotics. This nomenclature is proposed by keeping in mind the recent trends in the industry. As the demand for knowledge of computer-based courses is increasing, the subjects from Electronics & Communication Engineering as well as Computer Science Engineering are included. Also, the topics included in various competitive examinations of ECE and CSE are incorporated.

## Mechanical Engineering (JUET)

Mechanical Engineering is offered by the Department of Mechanical Engineering JUET-Guna. The department has established laboratories like Thermodynamics, Computer Aided Design, Strength of Materials, Fluid Mechanics & Machinery, Measurement & Control, Theory of Machine, I.C. Engines, Heat & Mass Transfer, Advanced Machining, Refrigeration & Air Conditioning, Dynamics of Machines, Additive Manufacturing (AM) and CIMS, 660 MW Super Critical Thermal Power Plant Training Simulator (at JUET) for hands on experience in practice and design. It lays emphasis on subjects like Flexible Manufacturing Systems, Computer Integrated Manufacturing, Additive Manufacturing, Robotics, Tribology, Composites and Laser Materials, Finite Element Methods to provide the graduates to take up the challenging tasks for leading sectors of manufacturing, design and energy generation & conservation and R & D and provides adequate exposure for hands on experience.

## B.B.A (3 Years) (JIIT in JBS)

The 3 year full time BBA curriculum is imaginative and flexible and is comprised of creative combinations of disciplines of study. Innovative and stimulating Pedagogical practices stimulate the students' learning experience. The BBA program aims at developing in the students a set of broad based competencies, an understanding of the social and human context and instill in them strong ethical values.

The broad goal of the BBA program is to provide the students multi-disciplinary education that provides learning in multiple disciplines along with in depth knowledge of the management discipline. In this way the students are prepared to deal with complexity, diversity and change. Value added courses on communication, analytical and problem solving skills and theatre equip the students with the ability to apply knowledge and skills in the real world settings.

Successful graduates of this course can opt for a range of jobs from sectors like Finance, marketing, sales, management, government, HR, data analytics, health and education.

The curriculum of this 3 year undergraduate BBA program is designed with the options of specialization in Finance, marketing, HR, IT applications in Management and Data Analytics. The curriculum is spread over six semesters with each semester having sixteen weeks that includes teaching and evaluation.

Last two semesters of the programs makes provision for choice of discipline Specific electives for specialization.

Two important stages of learning apart from acquiring knowledge is practicing and performing and it is these two aspects that JBS focuses on. Learning by doing is the norm wherein the students apply theoretical knowledge in real world to generate tangible outcomes.

## 5 Years Integrated M.Tech Programs (JIIT)

### Computer Science & Engineering

The five year integrated M.Tech. program is designed for those students who are deeply fascinated by Computer Science & Engineering and are keen on specializing in this discipline. Through six months full time dissertation, students are groomed to start an R&D oriented career in IT industry or pursue their doctoral studies in Computer Science & Engineering. The curriculum offers foundation as well as advanced courses on a wide spectrum of computing areas-Programming, Algorithms, Databases, Computer Organization and Architecture, Operating Systems, Computer Networks, Web and Mobile Computing, Embedded Systems, Distributed Systems, Artificial Intelligence, Machine Learning, Software Engineering, Information and Networks Security, Multimedia Computing, Performance Modelling, etc. The job opportunities and placement statistics of Integrated CSE program is equivalent to B.Tech. CSE & IT students. Moreover since these students have been exposed to the research based PG Curriculum, Integrated students are doing much better in the industry as well as in research.

## Biotechnology

The department offers a five years Integrated M.Tech program with additional specialized core and elective courses with Biomolecules and Cell Communication, Nanobiotechnology, Phytotherapeutics and Pharmacology, Regulatory Affairs, Drug Delivery, Genomics & Society Biostatistics, Product Development in Biotechnology, Experimental models in Research and Molecular Diagnostics .

The curriculum is designed to generate trained manpower in biotechnology, equipping our students with knowledge and hands-on skills in constantly advancing biotechnological areas. Firm with our belief in comprehensive growth of our students, we work to enhance their proficiencies by our strategically designed laboratory experiments and mandatory components of Project Based Learning, Seminar & Term Papers along with year-long research project(s) and industrial trainings, providing the students with necessary scientific and professional exposure to firm their grounds before stepping into their respective career directions, be it fields of R&D, Academics, Consulting, etc.

## Electronics and Communication Engineering

The integrated M.Tech program in Electronics and Communication Engineering is a specially designed program which includes courses of both B.Tech and M.Tech degrees in the discipline of Electronics and Communication Engineering and emphasizes on an in- depth understanding of several advanced and state-of-the-art courses in the area of Signal & Speech Processing and Coding, Wireless Communication, VLSI, System on Chip, Satellite Communication, Machine Learning, Microwave Engineering etc.

The integrated program provides the students with the opportunity to acquire comprehensive understanding in an area of their selected field through electives and individual projects. The laboratory courses offer practical exposure to them. The program prepares the students for research and development activities, industrial work as well as for higher studies.

# P G Programs

## M.Tech (2 Years)

The objective of the program is to impart advanced level knowledge in specialized field making the students fit for academia as well as industry and assume responsibilities requiring further research, design and development aptitude. Through compulsory core and open elective subjects, the students acquire a state-of-the-art advanced knowledge in a chosen field of specialization. These selective courses give the opportunity to further specialize in the field depending on his/her interest and the future career plan. For project work and dissertation students are required to take-up problems on a particular topic in the field culminating in submission of a dissertation/report.

## M.Tech in Computer Science and Engineering (JIIT, JUIT, JUET)

The program provides advanced level education and research exposure in various areas of computing - Algorithms, Distributed Systems, Software Engineering, Machine Learning, Databases, Computer Networks, Computer Architecture, Information and Networks Security, Big data, Cloud Computing, Data analytics and IOT etc. These advanced level courses and M. Tech dissertation lay the foundation for potential doctoral work in CSE.

## M.Tech in CSE with specialization in Data Analytics (JIIT)

M.Tech (Data Analytics) is an inter-disciplinary program offered by Department of CSE & IT and is designed to meet the huge manpower shortage in this field. All business and government organizations working in commerce, policy, insurance, finance, economics, engineering, infrastructure, energy, health care, education, security, sports, media, culture, etc. are increasingly relying on computational tools and techniques of data analytics for taking informed decisions.

This program has been designed to develop the ability to apply and develop computational techniques and systems to draw insights from big data in a variety of application domains. The curriculum exposes students with all aspects of data analytics including research design, data collection, preparation analysis, integration, visualization, and interpretation. In addition to CSE & IT Department, Departments of Mathematics, HSS as well as Business School will also contribute to this program.

The core courses include statistical data analysis, financial econometrics, data warehousing and data mining, pattern recognition and machine learning, large scale

graph analytics, empirical research and laboratories. Students will also be offered several electives on theoretical, systemic, algorithmic and applied aspects of data analytics. This two year full

Time program is open for candidates with B.Tech. (in any discipline) or Masters(in Computer Applications/Computer Science/IT/Maths/Statistics/Operations Research/Physics/Electronics/Instrumentation) or equivalent.

## M.Tech in CSE with specialization in Artificial Intelligence and Machine learning (JIIT)

M.Tech in CSE with specialization in Artificial Intelligence and Machine learning aims to focus on Machine Learning techniques to intelligently handle large and complex amounts of information build upon foundations in many disciplines, including statistics, knowledge representation, planning and control, databases, causal inference, computer systems, business and finance, machine vision and natural language processing etc. This program will provide students an opportunity to learn both foundational and experimental components of Machine Learning and Artificial Intelligence. The objective of this post graduate program is to develop the ability and skills to undertake careers involving development, innovation and problem solving using Artificial Intelligence and Machine Learning technologies. This two year full time program is open for candidates with B.Tech. (in any discipline) or Masters (in Computer Applications/Computer Science/IT/Mathematics/Statistics/Operations Research) or equivalent.

## **M.Tech in CSE with specialization in Internet of Things (IoT) (JIIT)**

A new era of engineering, Internet of Things (IoT), has gained interest in last few years. IoT is a network of connected devices and people, which collects and communicates data from environment around them. Applications of Internet of Things (IoT) are in smart agriculture, transportation, environment monitoring, healthcare, and smart wearable. M.Tech. program with specialization in IoT is especially designed for young innovators to provide them a breadth as well as depth for designing systems for the current era of IoT. The objective of this post graduate program is to produce skilled graduates with deeper understanding of IoT systems and ability to follow multidisciplinary approach for design, development, simulation, and implementation of IoT systems. This two year full time program is open for candidates with B.Tech. (in any discipline) or Masters (in Computer Applications/ Computer Science/ IT/ Maths/ Statistics/ Operations Research) or equivalent.

## **M.Tech in CSE with specialization in Information Technology & Entrepreneurship (JIIT)**

This is a joint P G program offered by Department of CSE & IT and Jaypee Business School, Noida. It is designed for graduates with IT background who are keen in pursuing information technology centric entrepreneurship or taking leadership positions in innovative technology – based startups and other organizations. The curriculum includes courses on information technology and entrepreneurship management. Second year of the program is devoted to industrial internship and IT entrepreneurship project to develop an investor – ready business plan. Through this program, the student will also network with successful role model innovators, entrepreneurs, and enterprise development experts. This two year full time program is open for candidates with B.Tech. (in any discipline) or Masters (in Computer Applications /Computer Science /IT/ Maths/ Statistics/ Operations Research / Physics/ Electronics / Instrumentation /management) or equivalent.

## **M.Tech in Electronics & Communication Engineering with specialization in Micro Electronic Systems & Internet of Things (JIIT)**

M.Tech. in Microelectronics & Internet of Things (MIoT) is designed to provide electronics engineers with highly specialized knowledge and experience that they need to design, fabricate and test devices, circuits and systems at micro scale.

The program offers a set of courses that allow students to gain expertise in areas that include back-end and front-end microelectronic designs such as processor and SoC design, chip design, etc. In addition, it introduces the basic IoT architectural overview, its design principles and needed capabilities and also concepts on real-world designs. The program curriculum is divided into theory, laboratory practice and projects. Along with the core courses, there are several elective courses, audit courses, project based learning courses and open electives. The dissertation in the final year enables students to apply concepts and techniques learnt during the program. Keeping in view the market trends and demands, the core laboratories for VLSI design and simulation, Internet of Things, etc. have been established. The aim of the program is to provide students a broad base of education and understanding about the semiconductor industry linked with IoT, enabling them lucrative opportunities in their future endeavors.

## **M.Tech in Electronics & Communication Engineering with specialization in Wireless Communication (JIIT)**

M.Tech in Electronics and Communication Engineering (ECE) with specialization in Wireless Communication (WC) encourages students to develop an in-depth theoretical and practical knowledge of advanced communication systems (4G, 5G and beyond).

The contents of the course are designed meticulously keeping in mind the demands of wireless and mobile industry. The stream also includes advanced concepts of optical wireless communication, microwave and millimeter wave communication, 4G and 5G antenna technology etc. along with basic telecommunication courses. The course is well supported by laboratories like Advance Communication Laboratory, Research Laboratory. with many software and hardware tools.

As per the university regulations, a student enrolled in the M.Tech in ECE (WC) is required to enroll in various core subjects, electives, labs, project based learning, seminars, and dissertation/Industrial Project. Duration of dissertation/ industrial project is of 2 semesters wherein the student applies the theoretical concepts learned to practical applications.

## **M.Tech in Electronics & Communication Engineering with specialization in Machine Learning and Signal Processing (JIIT)**

The M.Tech program in Machine Learning and Signal Processing is aimed at providing a deeper understanding of the mathematical, theoretical, practical, and application

aspects of machine learning and signal processing and create professionals who are industry ready.

Machine Learning usually plays an important role in the transition from data storage to decision systems based on large database signals such as those obtained from sensor networks, internet services or communication systems. The program will focus upon machine learning methods and their applications to signal processing. The curriculum comprises of subjects like introduction to machine learning, advance signal processing, optimization techniques, statistical signal processing, image and video processing, advanced topics in machine learning, computer vision, biomedical signal processing, speech and audio processing, fuzzy logic, python, data analysis, and algorithms.

In first year, students are introduced with various theory and laboratory courses followed by a research based Dissertation/ Industrial Project spread across third and fourth semesters. Thus, the students are having deeper knowledge of signal processing area and its implementation with machine learning. are fully equipped to undertake research and development, work in academia or in industrial environment.

### **M. Tech. in Biotechnology (JIIT & JUIT)**

To address the needs of industry and academia, the M. Tech (Biotechnology) program offered by the department provides our students with research experience to support focused coursework in specific sub-areas of biology, to help broaden their exposure to biology and prepare them for fields of teaching, consulting, etc.

The M.Tech program in Biotechnology is designed to generate trained manpower in biotechnology, equipping our students with knowledge and hands-on skills, making them proficient in constantly advancing biotechnological areas as diverse as Functional and Evolutionary Genomics, Proteomics, Drug Target Discovery, Nutraceuticals, Microbial biodiversity/bioremediation, Bioprocess Technology, Nano-Biotechnology, Biosensors, Product Development in Biotechnology, and Intellectual property rights (IPR) in Biotechnology. Strategically designed laboratory experiments and mandatory components of Project Based Learning, Seminar & Term Papers along with year-long research project(s) and industrial trainings, provides the students with necessary scientific and professional training to firm their grounds before stepping into their respective career directions.

### **M.Tech in Civil Engineering (Construction Management) (JUIT)**

The program provides preparation for effective leadership in the field which includes light (residential and small office buildings) and heavy (large office buildings and facilities, infrastructure) projects. It aims at educating the students with regulatory, insurance, management, safety, planning tools, estimation and environmental aspects of management necessary for overall planning and control of construction projects. The course helps in gaining innovative problem-solving skills to determine costs and apply time-value-of-money concepts to effectively evaluate alternatives. With a curriculum developed in collaboration with the University of Florida (USA), the programme assures relevant and global standards of education.

### **M.Tech in Biotechnology (Industrial Biotechnology)(JUIT)**

M. Tech Biotechnology with specialization in Industrial Biotechnology provides advantage to the students pursuing their career in various industries like food, beverage, and textiles etc. The program covers processing of industrial bioproducts and their engineering aspects to enhance the quality. Students also get exposure to a vast application of industrial enzymes. The demand of commercial enzymes or biological products including fermented products is growing rapidly. Industrial Biotechnology will empower students to suitably fit in industrial requirement. The program equally gives emphasis on laboratory skills by providing research work in second year that includes thrust area of Industrial Biotechnology.

### **M.Tech in Medical Biotechnology (JUIT)**

Medical Biotechnology is a growing field. The specialization is designed for students who wish to pursue their career in pharmaceutical or medical biotechnological

companies. The program covers technologies involved in clinical diagnostics, basic and advance knowledge on various biomarkers to track pathological conditions. Manufacturing of diagnostics kits, laboratory reagents and vaccine production etc require skilled personnel in the area of medical biotechnology. After completing the program students may suitably fit into these emerging areas. Students are provided with good understanding on immunological system of host and how vaccine works and basic understanding on strategies during vaccine production. In addition special emphasis is given on cancer biology and biology of opportunistic pathogens. The program allows students by providing research work in second year that includes thrust area of Medical Biotechnology.

### **M.Tech in CSE(Information Security) (JUIT)**

Information Security aims to train students to become information security professionals for the high-end jobs in the security industry. The objective of this programme is to create security professionals who will be handling the real-life problems and challenges the industry is facing today in connection to cyber security. The unique design of the programme focuses on providing a high degree of industry exposure, academic and functional experts from the industry in this domain. This programme offers a brilliant career pathway to those who are passionate about knowing more about security challenges and solutions as well as practising security analytics, cybersecurity, and related tools and technologies. Job Openings for cybersecurity are also increasing by 200% each year in India.

### **M.Tech in CSE (Data Science) (JUIT)**

Data Science is one of the most happening fields in business today, creating a higher number of career opportunities. Data Scientists are in high demand around the globe almost in all existing verticals i.e. Education, Manufacturing, Healthcare, Agriculture, etc. The course has inclusive realms, namely Statistics, Machine Learning/ Programming/Data Skills, Business Domain knowledge; covering all the mains of the Data Science helps you to achieve a solid grip over it. One of the major objectives of this course is to provide an in-depth understanding of data structure and data manipulation, and understanding of various supervised and unsupervised learning models such as linear regression, logistic regression, clustering, dimensionality reduction, K-NN, and pipeline.

### **M.Tech in ECE (Internet of Things) (JUIT)**

M.Tech in ECE with specialization in the Internet of Things (IoT) is an interdisciplinary

program. This course is mainly related to the network of physical objects—"things"—that are embedded with sensors, software, and other technologies for the purpose of connecting and exchanging data with other devices and systems over the Internet. The aim and objectives of this course is to: Generate IoT concepts and design IoT solutions within your area of expertise, Map out the process for an IoT solution, and identify the sensors and other devices required, evaluate different infrastructure components and network systems, and design the basic network for your IoT ideas, apply software solutions for different systems and Big Data to your concept designs, and appreciate how data is managed in the network, Identify and analyze IoT security and privacy risks, and concept design secure hardware and software. The main contents of the course will be: Introduction to the Internet of Things (IoT), IoT Sensors and Devices, Embedded Deep learning at IoT device layer, IoT Networks and Protocols, IoT Programming and Big Data, Cyber security and Privacy in the IoT, Programming & Interface on Raspberry Pi and Jetson nano development boards, and design of IoT prototype project addressing diversified applications.

### **M.Tech in Civil Engineering (Structural Engineering) (JUIT & JUET)**

This course is designed for students who wish to specialize in structural engineering. The program emphasizes analysis and design of structures like bridges and multi-storied buildings. The course introduces numerically demanding research and design exercises relating to a wide-range of structures using simulation, modeling and computational software programs. The program lays equal emphasis on laboratory work, industrial visits and research based dissertation. M. Tech. program in Structural Engineering provides a basic preparation for professional careers and an understanding of design, comprehension of the commercial world and competence in transferable skills.

### **M.Tech in Civil Engineering (Environmental Engineering) (JUIT & JUET)**

The interdisciplinary program is aimed at imparting advanced level education in Environmental Science and Engineering for analyzing and controlling environmental pollution and develops control technologies and management practices for sustainable development. The course offers a wide variety of electives in areas like clean technologies, membrane separation processes, resource conservation, water quality management and solid waste management.

M.Tech in CSE with specialization in Information Security (JUIT) Information security is a fast growing area and has been recognized as a national priority. This program aims to enhance the knowledge and core competencies in contemporary computer science and also provide a deep understanding of security related aspects. The curriculum includes a comprehensive set of core and elective courses to achieve both these purposes.

### **M.Tech in Chemical Engineering (JUET)**

The program provides advanced courses in areas such as Process Modeling and Optimization, Advanced Separation Processes, Advanced Process Control, Advanced Transport Phenomenon and Fluidization Engineering. The course offers a wide range of electives. The students have to take a research activity as a component as major part of the program. The aim of the program is to train students to assume independent responsibilities laying emphasis on the country's current and future requirements in industry, R&D organizations, design firms and academic institutions.

### **M.Tech in Mechanical Engineering (Manufacturing Technology) (JUET)**

M.Tech in Mechanical Engineering (with specialization in Manufacturing Technology) has been developed keeping the industrial requirement in view. Applications of

Manufacturing Technology are to manage manufacturing resources efficiently and effectively and thus improve the productivity of an industrial organization. The curricula of this program is open to Mechanical and Production Engineering graduates only.

# M.Sc. Programs

M.Sc. (2 years) programs in Sciences and Mathematics are designed to cater to the need of academics, research and industry. M.Sc. courses explore advanced theory and analysis together with their applications in a range of practical contexts. These courses offer an exciting opportunity to those interested in higher studies in Sciences and Mathematics.

## M.Sc in Physics (JIIT, JUIT & JUET)

A two year M.Sc program in Physics is offered by the department of Physics and Materials Science and Engineering (PMSE). The course curriculum of this program is designed with an objective to provide understanding and skills in Physics suitable for a professional career in academics, R&D and doctoral studies in sub-domains of experimental and theoretical Physics/Applied Physics.

The curriculum of this four-semester program follows choice based credit system (CBCS) with the option of advanced study and training in two specializations: Solid State Physics and Optoelectronics. The first three semesters cover the fundamentals of the subject. During the fourth semester, students undertake project/ dissertation work. The department has well equipped curricular and research laboratories with modern and state of the art equipment. In addition, regularly organized seminars,

expert talks, and opportunity to interact with a large number of PhD students and Post-Doctoral fellows bestow a dynamic ambience and an excellent learning environment.

## M.Sc in Mathematics (JIIT & JUET)

The M.Sc. program in Mathematics is carefully designed to convey essential knowledge in Mathematics and to provide substantial opportunities for pursuing excellence in all major areas of pure and applied mathematics. The objective of this program is to develop mathematical aptitude in students, nurture their interests towards mathematics and motivate them for research in mathematical sciences. It consists of a broad based curriculum which reflects an extensive understanding of different aspects of mathematics and its applications. The wide range of application oriented course is so designed that after the completion of the course, the students would be well equipped to go to industries or to join academics.

## M.Sc in Microbiology (JIIT & JUIT)

M.Sc. Microbiology is a full-time credit-based 2-years program run by the Department of Biotechnology. The curriculum has been designed with a balanced mix of basic and advanced theory and practical courses with the aim to keep students abreast of the latest advances in the field. The course encompasses various booming fields within the domain, focusing on microbiology in medicine and pharmacy, agriculture, food and dairy industry, environmental and nanotechnology, emphasizing on the latest advances in the field. Core and optional subjects in various fields of microbiology and allied areas such as Microbial Genetics and Molecular Biology, Environmental Microbiology, Enzymes & Bioprocess Technology, Medical Microbiology, Food & Dairy Microbiology, Recombinant DNA Technology, Bioinformatics & Omics, Vaccine Biology, Probiotics & Prebiotics, Microbial Technology, Metagenomics and Microbiomics provide in-depth knowledge. The course offers an optimum blend of theory, labs and dissertation/hands on project work, realizing the importance of transposing theoretical knowledge into practical implementation. The intention is to open various avenues for our graduates, preparing them for diverse career opportunities in Hospitals, Diagnostics, Pharma and Biopharma R&D's, Clinical laboratories, Food Industry, Food Safety, and Quality Control, as well as in core biotechnology industries. The final semester provides the base to hone their research skill in dissertation work and present their research findings. With the well-designed courses, the program aims to make the students ready for research, industry and entrepreneurial endeavors.

## M.Sc. in Environmental Biotechnology (JIIT)

With an increasing awareness on environmental issues amongst general public, who's genuine concern towards deteriorating environmental quality is pushing research in the domain of environmental biotechnology. Biotechnology involves the use of living systems for developing products for the benefit of mankind. It is a broad area encompassing applications in various fields such as medicine, food, and environment. Environmental biotechnology specifically focuses on the application of biotechnology-based processes for providing solutions to minimize, and ultimately combat environmental damage. Emerging concerns regarding global environmental changes require an urgent necessity to address the issues arising from pollution, change of climate, damage to natural ecosystems and biodiversity and food security. As an example waste production is expected to go up to 2.2 billion tonnes by 2025 and it is estimated that 3 million people are hospitalized due to chemical poisoning every year (FAO data), arising from contaminated soil and water.

The sustainable and eco-friendly nature of Biotechnology-based solutions is a promising alternative for finding cost-effective measures. Microorganisms and plants are being used for bioremediation of environmental pollutants and commercially available technologies have proven to be safe and effective. Phyto-remediation is also emerging as a promising approach. In contrast to available conventional

technologies, biotechnology-based strategies for the environment can be very successfully implemented, keeping environmental laws and regulations in mind.

The rigorous two-year M.Sc. program in Environmental Biotechnology prepares our students from basics-to-application of existing and emerging biotechnological tools for the process development and reducing or mitigating the impact of environmental pollutants. The program makes available, the avenues for a career in industry, academia, and entrepreneurship, both in public and private sectors.

## M.Sc in Economics (JIIT)

This programme provides the students the necessary analytical and quantitative skills and knowledge for demanding careers in the field of economics. The programme is interdisciplinary in nature. It gives students strong foundations in contemporary economic theories, methods of econometric analysis, mathematics and computer programming that will help them to analyze and forecast various processes associated with economics.

This is an advanced course in Economics and its applications with special emphasis on quantitative methods. On completion of the programme, the students would be able to pursue an academic career in Economics or take up responsible positions in various private and public sector organizations. The programme provides an edge for students who are aiming to make a career in Analytics and Credit Scoring Sector most notably in Banking, Insurance, Scientific Research and Auditing & Consulting firms.

## M.Sc. in Biotechnology (JUIT)

M.Sc. Biotechnology is a full-time credit-based 2-years program of four semesters run by the Department of Biotechnology and Bioinformatics. The curriculum has been designed to impart basic and advance knowledge of concepts and applications of Biotechnology in various domains e.g. Industry and Bio-processing, Medical, Healthcare, Agriculture and Environment. Students are provided rigorous hands-on skills in the practical courses to develop their research acumen during their research projects. This enables them to design; conduct experiments to analyze and interpret data for investigating problems in Biotechnology and Allied fields. Students are trained to acquire competitive edge to get Biotechnology oriented jobs in industry to pursue entrepreneurship ventures. Since 2020 the DBT, Govt of India has sanctioned 10 seats supported by DBT (selected through GAT-B) out of the total 30 seats in the program.

# MBA Programme at Jaypee Business School (JIIT)

The MBA Curriculum at JBS is designed to pave the way for a successful career in the business/corporate world and sow the seeds of entrepreneurship. The MBA curriculum at JBS offers both rigour and flexibility. The core curriculum is cross functional wherein fundamental business courses on Marketing, Business Analytics, Economics, Finance and Accounting, Statistics, Human Resource Management, Business Communications, Information Technology and Operations are offered.

In the second year, the students can choose from a wide range of electives to suit their interest and aptitude. The students opt for one area of major specialization and one area of minor specialisation. The curriculum is constantly evolving with inputs from faculty members, industry professionals, alumni, students and academic professionals from reputed organisations.

The MBA program at JBS equips students to think logically and work in diverse teams and enables them to integrate knowledge across functional areas. The program

aims to build socially sensitive managers through its four week mandatory social internship in an NGO.

The eight week corporate internship at the end of the first year enables the students to gain first hand experience of working in the real world.

To ensure that our management graduates are not only adept at using technology for making decisions but are also able to understand how to advance their knowledge across multiple technologies, JBS has introduced Technology in Management Courses in the core areas. Courses on Internet of Things, Artificial Intelligence in Business, Integration of Information Systems in Business are part of the core curriculum. In addition, through courses such as Data Visualisation, Analytical and Technical Skills (Lab) and Data Analytics for Business Decisions, JBS ensures that students learn to design and implement database management systems.

# Doctoral Programs (Ph.D)

The Ph.D. programs are available in various specializations such as Bioinformatics, Biotechnology, Civil Engineering, Chemical Engineering, Mechanical Engineering, Computer Science and Engineering, Information Technology, Electronics and Communication Engineering, Management, Humanities & Social Sciences, Mathematics, Physics, Chemistry, Materials Science and Engineering at various campuses. The scholars are required to take up intensive research work under the guidance of a supervisor on a specific problem for a minimum of three years. The research work is expected to result in new findings, contributing to the knowledge

in the chosen field. The doctoral research program gives an opportunity to students to demonstrate their analytical, innovative and independent thinking, leading to creativity and application of knowledge. The scholars are required to deliver seminars on their research progress regularly and publish their work. Finally, they are required to submit the thesis embodying their research findings for awarding of the Ph.D. degree. They are also required to take-up some advanced level course work.

Financial Support is provided to eligible full time Ph.D students in the form of Research Fellowship/Teaching Assistantship.

Program	JIIT-Noida	JUIT-Waknaghat	JUET-Guna
<b>Electronics &amp; Communication Engineering</b>	Speech processing, Signal processing, Machine Learning, Image and Video processing, Filters, Optical and Wireless Communications, Wireless Sensor Networks, CMOS design, Micro-electronics, Internet of Things, VLSI design, Embedded Systems, RF and Microwaves.	Digital Signal Processing, Genomics Signal Processing, Biomedical Signal and Image Processing, Computer vision & Robovision, VLSI & Embedded System Design, Mobile & Wireless Communication, 5G Communication, Software defined radio, Distributed Control Systems, Networked Control Systems, Automation and Intelligent Systems, Applications of Internet of Things, R.F. & Microwave Engineering, Smart and 5G antenna design, Application AI based techniques.	Digital Signal Processing, Image Processing, Stochastic computing, VLSI, Resource constrained design, Wireless Communication, Digital Commutation, Soft computing, RF and Microwave, and Bio-metrics.
<b>Computer Science &amp; Engineering</b>	Artificial Intelligence and Machine Learning, Information Retrieval, Data and web mining, Distributed Systems & Cloud computing,, Computer Networks, Wireless Networks, Web & Mobile Technologies, Security, Software Engineering ( Agile, DevOps etc), Data Analytics, Big Data, Social Network Analytics, Multimedia Technology and Applications, IOT & IOT security	Parallel and Distributed Computing, Mobile Computing, Cloud Computing, Computer Networks, Wireless Sensor Networks, Forensics, Security, Software Engineering, Image Processing, Computer Vision, Data Mining & Warehousing, Information Retrieval, performance of Algorithms, Artificial Intelligence, Natural Language Processing, Internet of Things(IoT), Information Security, Vehicular Networking.	Grid Computing, Cloud Computing, Image Processing, Pattern Recognition, Image Security, Network Communication, Information System Security, Software Engineering, Data Mining & Warehousing, Big Data and Data Analytics. Wireless Sensor Networks, Internet of Things.
<b>Biotechnology &amp; Bioinformatics</b>	Medical Biotechnology, Bioinformatics, Genomics & Proteomics, Plant & Microbial Biotechnology, Environmental Biotechnology, Novel Drug Delivery Systems, Nano- Biotechnology, Infectious Diseases, Life Style diseases, and Food Technology.	Genomics, Microbial Biotechnology, Plant biotechnology, Industrial biotechnology, Environmental Biotechnology, Food Technology, Computational Biology, Natural Products as Drugs and Nutraceuticals, Computational Drug Discovery, Medicinal Chemistry, Neuro Pharmacology, Stem Cells, Infectious Diseases, Cancer Biomarkers, Medical Biotechnology.	

Program	JIIT-Noida	JUIT-Waknaghat	JUET-Guna
<b>Physics &amp; Materials Science and Engineering</b>	Advanced Materials, Nanoscience and Nanomaterials, Quantum Optics & Computing, Atomic & Molecular Physics, Energy Materials and Devices, Photonics and Plasma Physics, Semiconductors.	Semi Conducting Chalcogenides, Nano-ferrites, Microstrip Antennas, Nanoscience and Nanotechnology, Polymers, Nano-sensors.	Spectroscopic Studies of Polymers and Finite Crystals, Nanomaterials, Energy Storage Devices, Nonlinear Dynamics and Quantum Optics.
<b>Mathematics</b>	Fractals & Chaos, Mathematical Analysis, Numerical Analysis, Computational Continuum Mechanics, Fuzzy set theory, Information Theory, Soft Computing, Image Processing, Optimization Techniques.	Differential Equations, Mathematical Modeling and Simulation, Elasticity, Wave Propagation, Fuzzy Information Theory and Decision Making, Differential Geometry, Algebraic Coding Theory Statistics, Statistical Inference.	Fluid Mechanics, Information Theory and its Applications, Fuzzy Sets and logic & Fuzzy Information Measures.
<b>Humanities and Social Science</b>	Political Sociology, Anthropology; Psychology, Public Finance, Development & Health Economics; Financial Accounting and Evaluation, Corporate Finance, Banking; Indian literature, Organizational Behaviour, HR Information System, Emotional Intelligence, Social Media & E Marketing.	Finance, Economics, Management, English, Marketing Management, Human Resource Management	Human Resource Management & Behavioral Studies, Economics and Human Behavior at work place, E-Commerce, Marketing Management, Communication at work place.
<b>Civil Engineering</b>		Rock Mechanics, Geotechnical Engineering, Fluvial Hydraulics, Environmental Engineering, Concrete Technology, Transportation Engineering.	Concrete Technology, Geotechnical Engineering, Hydraulics & Water Resources Engineering, Transportation Engineering, Environmental Engineering.
<b>Chemical Engineering</b>			Recovery of Metals from Industrial Wastes, Foam fractionation & Control of Volatile Organic Compounds.
<b>Mechanical Engineering</b>			Dynamics of Machine Tools, Machine Design and Vibration Analysis, Condition Monitoring and Fault Diagnosis of Machine Tool Structures, Analysis of Machine Tools, CAD/CAM, Advanced Manufacturing Processes, Computational Fluid dynamics, Heat and Mass Transfer, Refrigeration and Air Conditioning, Solar thermal Applications, Renewable Energy and Solar Water Desalination.
<b>Chemistry</b>			Novel Surfactants, Oleo Chemicals, Polymer Chemistry, Environmental Science, Natural Products
<b>Management</b>	Marketing, Finance, Operations and Supply Chain Management, Economics and International Business, Human Resource Management and Organizational Behavior.		

# Libraries

## Learning Resource Centre (JIIT)

(LRC at JIIT Noida is an excellent repository of learning resources. It is fully integrated with the latest barcode technology and international standard open source library management software "KOHA". Users can access bibliographic details of the LRC resources through OPAC anywhere, thus providing 24 hours access. The LRC consists of latest collection of textbooks as well as reference books, national as well as international peer reviewed journals, magazines and electronic resources on subject areas covered by the academic curricula of the Institute and other universal knowledge. LRC has provisions to subscribe full text science and technology on-line journals and other national and international journals in printed form. It is also an active member of Developing Library Network (DELNET) and provides inter-library loan services to its users. LRC has Anti-Plagiarism Software "Turnitin" and URKUND provided by INFLIBNET for its users. The open access system has been adopted at all service points where users may select material of their choice. LRC has implemented an anti-theft electromagnetic system at its main gate. LRC keeps itself updated by organizing book exhibitions/ conferences/ workshops from time to time

JIIT Noida has three Libraries – One Central Library at Sector-62, One Library at Sector-128, Noida and third Library at JBS for Management students. All students have access to all the three libraries. LRC has approximately.

• Book Titles	27100
• Book Volumes :	79649
• Print Journals :	82
• e-Journal :	17000+
• Other online resources :	355000+
• National Digital Library Contents :	597000+

## Learning Resource Centre (JUIT)

The Learning Resource Centre (LRC) at JUIT Waknaghat is the backbone of academic and research activities that supports teaching, learning and research aspects of the University. The LRC is established as three-storied entity embedded in the academic block of the University and entirely devoted to the scholastic needs of students and faculty. It possesses a wide range of information resources in the areas of Computer Science & Engg., IT, Civil Engg., Biotechnology, Bioinformatics, Mathematics, Physics & Materials Science, Electronics & Communication Engineering along with collections from Humanities and Social Sciences. A good collection of quality and latest books on competitive examinations and general readings also exist. LRC adopts an open shelf system that offers the freedom to students to visit, browse, read and explore any document available on the shelves and in digital mode.

The subscription of various scholarly databases such as ACM, IEEE, SpringerLink, ASCE, ProQuest with access to NPTEL and NDL resources is one of the key features of the LRC. Apart from the e-databases, LRC also subscribes to 84 print journals of repute. Subscription to various local, regional and national newspapers in Hindi and English is an important service of the LRC. The LRC activities are fully computerized with the help of Library Management Software, known as 'LIBERTY' and 'KOHA' has also been taking place. The OPAC feature of the software would provide seamless access to bibliographic details of library holdings to the users from anywhere over the Internet / Intranet.

The Library has been an active member of the National Digital Library (NDL) which is a project under the Ministry of Human Resource Development, India. JUIT provides access to over 1500 documents through NDL. It actively contributes to Shodhganga and Shodhgangotri repositories of UGC. Being an active member of the Developing Library Network (DELNET), users can avail inter-library loan facility of the library. LRC has been developed as a core student centric library with the help of its specialized services. All library services focus on users to keep them abreast of latest happenings in their respective areas of learning along with the procuring quality information resources, organizing book exhibitions and conducting user awareness programmes on a regular basis.

• Book Titles:	22037
• Book Volumes:	42431
• Print Periodicals:	84
• E-Journals:	7440
• Other online resources:	1044
• E-Books and NDL Contents:	42+ Lakh

## Learning Resource Centre (JUET)

LRC at JUET Guna is an excellent repository of learning resources. It is situated in AB-III, which can accommodate about 250 users at a time. It has more than 30 computer nodes with high speed Internet & Intranet connectivity. Systems of LRC are fully integrated with the latest barcode technology and International standard library management software Liberty. Users can access bibliographic details of the LRC through OPAC from any node of the campus, thus providing 24X7 access. The open access system has been adopted at all service points where users may browse and select material of their choice. The LRC consists of latest collection of textbooks, reference books, national and international peer reviewed journals, magazines and electronic resources on subject areas covered by the academic curricula of the

University. LRC has made provisions to subscribe full text engineering journals in printed form. It is also member of Developing Library Network (DELMNET) and provides inter-library loan services to its users. LRC has implemented an anti-theft electromagnetic system at its main gate. Subscription of Anti-Plagiarism Software "URKUND" is available under Shodh Shuddhi program of Ministry of HRD, Govt. of India. Subscriptions of 5000 + e-magazines and periodicals are available through Magzter. LRC collections are being updated periodically.

• Book Titles:	8695
• Book Volumes:	35902
• Printed Journals:	23
• e-Journals:	194406
• Other online resources:	367000
• National Digital Library Contents:	44814935

## Centres for Excellence

### JIIT, Noida

#### Prayag-A Centre for Knowledge Informatics for Sustainable Development

This centre contributes towards enhanced understanding of diverse human activities with an emphasis on sustainable development through an informatics inclusive cross-disciplinary approach. Main objectives of this centre are to incubate informatics inclusive cross-disciplinary R&D in newer, relatively unexplored and divergent application domains with a special focus on sustainability; to inspire and encourage academia (both faculty and students) for Sustainable Technology Research in the area of Energy Activities, Clean Water and Air, Green Chemistry, Healthy Living etc and to promote Cross-disciplinary practices and approaches for Sustainable Development.

Centre for Performance Modelling of Computing Systems (CPMCS) Centre for Performance Modelling of Computing Systems (CPMCS) has been initiated to provide a platform to researchers to share their experiences, insights, and challenges regarding modelling, simulation and performance evaluation in all areas of computer science engineering and information technology. Specifically, the academic activities of this centre are focused on modelling and simulation of computer networks (wired & wireless), wireless sensor networks, distributed systems, multimedia systems and techniques, databases & data mining techniques, computer architectures and processors, algorithms, social networks, software & information systems, etc. A number of post graduate students and research scholars contribute towards this endeavor resulting in good number of publications. CPMCS is equipped with latest machines and multi core processors for high end computing.

In early 2021, Department of CSE & IT will establish one more centre of excellence in Artificial Intelligence and Machine learning (AI & ML) which will be equipped with NVIDIA DGX workstation, which is one of fastest server for data analytics and AI & ML related applications.

#### Centre for Micro Electro Mechanical Systems (MEMS)

The Centre for MEMS Design was set-up at IIIT in the year 2009 as a part of Institute's response to launch MEMS activity NPMASS program. The National Program on Micro and Smart Systems (NPMASS), under Government of India was wholly supported by Defense Research & Development Organization (DRDO) through Aeronautical

Development Agency (ADA) and was endorsed by the five departments of DRDO, DOS, DST, CSIR and DIT. The co-coordinating institute is IISc Bangalore.

The program centers on collaborative research efforts, related to MEMS and smart sensors, of the Department of Electronics and Communication Engineering and Department of Physics and Materials Science. Under this project IIIT has been provided with three industry standard MEMS software packages namely Coventor Ware (01 license) and MEMS Plus (01 license), Intellisuite 8.7 (01 license) and COMSOL Multiphysics (32 licenses), all software's licenses are perpetual in nature. The hardware support for the project has been provided by IIIT, which includes a dedicated Server, Vector Network Analyzer and eleven workstations in MEMS Lab-I. For designing and simulation of interfacing integrated circuits, five licenses of Mentor Graphics IC design tool and Synopsys IC design tools are installed and regularly used by students and faculty. The departments promote the area of sensors and smart systems through independent departmental courses at UG/PG levels to involve students and faculties in developing MEMS related projects and research activities. Elective and Core courses are run by the ECE department for promoting research activities in this emerging area.

The research areas in MEMS in IIIT are Sensor/MEMS Interface CMOS Analog Chip Design, On-Chip RF Spiral Inductor Development, SAW based Temperature/Gas Sensor design and Advanced and Smart Materials.

## Centre for Emerging Diseases

Despite noticeable improvements in combating the global burden of newly emerged, re-emerged infectious and life-style diseases, millions of patients still fall prey to

the unbridged gap in their understanding. Research at the Centre of Emerging Diseases focuses to delve into underlying molecular events behind pathogenesis of emerging viral and bacterial pathogens (host pathogen interactions, essential metabolic pathways of pathogens), along with life-style diseases such as cancer, cardiovascular diseases, etc. The faculty uses integrative structural biology approach to design novel diagnostics and therapeutics. The research activities at the Centre has generated ~ 7.5 crore extramural research funding from various agencies of Govt. of India including Department of Biotechnology (DBT), Department of Science & Technology (DST), Indian Council of Medical Research (ICMR) and All India Council for Technical Education (AICTE).

## Centre for Plant and Microbial Biotechnology

The advances in research around the working of nature using biotechnology presents interesting opportunities to apply these principles to different fields of science. Our utmost priority is to find sustainable solutions to address the concerns on improving crop productivity, depleting natural resources, environmental pollution, safety of food and agricultural products. The increasing demand for naturally derived bioactive components of therapeutic and industrial importance (in the areas of healthcare, environmental remediation, agriculture biotechnology) corroborates the pursuit of natural and sustainable progression. The research activities at the Center for Plant and Microbial Biotechnology comprehensively focus on interdisciplinary fields of Bioresources, Biorefining, Bioremediation of Organic and Inorganic Pollutants, Enzymes for Environment, Food, Industrial Applications, Biofertilizer, Biocontrol

agents for agriculture improvement, and natural products for healthcare applications. The center has garnered extra mural funding from Department of Biotechnology (DBT), Department of Science & Technology (DST), Department of Ayurveda, Yoga & Naturopathy, Unani, Siddha and Homoeopathy (AYUSH), Ministry of Environment, GoI and Council of Science and Technology, U.P

## Jaypee Incubation and Innovation Centre

**“It’s not about ideas. It’s about making ideas happen.” - Scott Belsky** Jaypee Innovation and Incubation Center (JIIC) primary aim is to dispense development of innovation ecosystem and to engross faculty, research scholars, students, alumni and non-teaching staff in IPR, innovation and entrepreneurship related activities at JIIT by employing collaborative multidisciplinary efforts and skills. JIIC goal is manifold wherein we motivate student’s innovative engineering and entrepreneurial thinking, set up institutional innovative research goals, generate significant IPR rights, promote participative innovative leadership, encourage national and international research and act as a catalyst for a step change in the JIIT’s innovation capacity and compact. JIIC is also committed to foster student’s innovation and entrepreneurial skills, develop mentorship ecosystem, offer a dynamic platform for cutting edge and path-defining learnings and support innovations focusing on real-life problems. JIIC is also determined to engage JIIT faculty, students and staff in various “Out of the BOX” innovation and entrepreneurship related activities such as ideation, feasibility, planning, design thinking, problem solving, evaluation and coordination from Pre-incubation to Incubation phase.

## Online Education Cell

In tune with the changing times of technology-driven education, and making the teaching-learning progression accessible and inclusive, the Online Education Cell strives to set global standards in offering online and blended learning routes available for the student community. The Cell also will ensure that the quality of online/blended courses matches the standards set by national and international regulators/universities and evolves keeping pace with those standards. The guidelines developed by the cell, emphasizes on continuous improvement of the teaching-learning process. A focus on seamlessly merging in-classroom teaching with online/blended modes will ensure flexibility, beneficial to the learners in ensuring continuity of education beyond physical classroom hours, and contributing to possibilities of learners being able to merge work-skills with continuing education, with neither being a barrier due to time-space constraints and being location-independent.

## JUIT, Wagnaghat

### Centre of Excellence in Healthcare Technologies and Informatics (CEHTI)

Centre for Healthcare Technologies and Informatics (CEHTI) was established by JUIT in 2017. CEHTI aims to improve the scientific and practical research in the field of health informatics on a global level and to use it in building a knowledge society. This Centre focuses on recent developments in the health care sectors along with its coordination with rapidly developing informatics techniques. Various activities such as workshops, training programs and invited talks are regular feature of CEHTI. Workshop on Bioinformatics and Biomedical Image and Signal Processing is a biannual event of this centre. Through this workshop, training is imparted on recent developments in genomics, proteomics, structural bioinformatics, NGS data analysis, systems biology, biomedical image & signal processing, machine learning, artificial intelligence, deep learning modules and their applications in health and medical sciences.

The very first National workshop of the Centre was on Bioinformatics and Biomedical Image Analysis (NBBIA) was organized by CEHTI during 29-31 May, 2019. More than 20 participants from all over the country participated from Palampur, Dharmashala, Solan, Shimla, Chandigarh, Dehradun, Allahabad and Delhi.

It is anticipated that CEHTI will provide global leadership in health information through creativity, state-of-the-art workshops and training programs.

### Centre for Sustainable Technologies for Rural Development

The vision of CESTRD, established at Jaypee University of Information Technology (JUIT) is to focus on the development of rural personnel and to benefit the people of all age groups irrespective of gender, race and financial category in Himachal Pradesh (H.P). The aim of the centre is to impart awareness about sustainable technologies for convenient livelihood in H.P. The sustainable technologies include renewable energy (Biofuels, Solar cells), pine briquettes, biofertilizers, rain harvesting, and water recycling. CESTRD is also determined to train the rural youth about use of upcoming technologies for skill development and to upgrade their acquaintance about self employment and entrepreneurship. The centre targets the rural youth, women groups and rural development committees through continuous consultancy, training and workshop sessions. The highlights of the centre (2018-2019) are:-

- The Centre has established biogas reactors in various Govt. schools, Universities (Solan, Sirmaur, Bilaspur Districts) of Himachal Pradesh and elsewhere (Air Force

Station, Chandigarh). These biogas reactors running on food waste and gas, fulfill the partial need for cooking the mid day meal in schools. The centre has also established 2019), and other supplies cooking gas to worker's mess. The Govt. of Himachal Pradesh and Jharkhand have empanelled JUIT as technical agency in biogas.

- The Centre organized seminars in the field of Renewable Energy in collaboration with Chamber of Industries and TIEDC, JUIT.
- The CESTRD has developed vermicompost for the use of horticulture.
- The CESTRD imparted training on organic farming to students and faculty of various educational institutes.
- The Centre organized a week long program (4th to 9th November, 2019) on Sustainable Technologies for outstation students. They were trained in Biogas fabrication & working, Briquettes formation from Pine needles, Vermicomposting, Green house technologies, Solar technologies, Waste water treatment technologies. The students from various schools, colleges and Universities of Himachal Pradesh and Punjab attended this program.

In near future, the centre is taking up a program of Skill development for science graduates of Himachal Pradesh.

## Centre for Structural Engineering and Sustainable Development

The Centre of Structural Engineering and Sustainable Development encompasses the modern world's needs such as those pertaining to earthquake-mitigation, disaster management, energy efficient green buildings and multi-hazard assessment of the built environment. The following advanced studies are undertaken:

- (a) Seismic-vulnerability assessment of the existing Civil Engineering infrastructure in the hilly region (in the state of Himachal Pradesh) and suggest remedial measures such as retrofitting strategies and develop new low-cost earthquake-mitigation techniques for residential buildings. This has become even more important given that few major earthquakes are imminent in the Himalayan region.
  - (i) Multi-hazard assessment of the buildings, especially those exposed to jungle-fire or landslides, in order to develop remedial measures to minimize the damage to the infrastructure and saving lives and property.
  - (ii) The structural design philosophies have been changing over decades; viz. from working stress method (WSM) to limit state design (LSD) to performance

based design (PBD). It has been observed that ignoring uncertainties in various input parameters may lead to underestimated or overestimated design of structural systems. There is a need of reliability-based design of structures and foundations. This will remain one of the focus areas in the vision items postulated herein.

- (b) Sustainable development is yet another important aspect is stressed upon. This is the infrastructural development that meets the needs of the present without compromising the ability of future generations to meet their own needs. One of its key concepts is the idea of limitations imposed by the state of technology and social organization on the environment's ability to meet present and future needs. Development of new materials (such as self-healing concrete, pine-needle embedment) with optimal utilization of locally available resources and design the dwelling units with such volumes orientation and opening-sizes so as to minimize energy requirements, is the main focus of this proposal. This will help protect the environment with minimal CO<sub>2</sub> emissions.

## JUET, Guna

### Centre for Cement Research and Development (CRDC)

Cement Research Development Centre at JUET, Guna was established with the aim of carrying out research in the areas of utilization of waste materials as cement additives and as raw materials. CRDC provides consultancy to cement industries and conducts short term training programs for the working personnel.

### Jaypee Wind Engineering Application Centre (JP-WINCENTRE)

A state-of-the-art Boundary Layer Wind Tunnel (BLWT) facility is in an advanced stage of establishment at the JUET Campus, for providing innovative solutions to problems of industry and for undertaking quality research in wind engineering.

The Centre has been set-up with the vision of becoming a Centre of Excellence of international repute in the field of Wind Engineering.

### OPERATOR TRAINEE SIMULATOR

660 MW Super Critical Power Plant Simulator facility to train students and also to extend short term training to power sector industry personnel has been established. It is a generic simulator and a trainee gains in-depth knowledge of different components of super critical power plant operations.

# Entrepreneurship Development Centre

## JIIT, Noida

### Jaypee Entrepreneurship Development Centre

The centre has been set up at JIIT to provide a platform to foster innovation activities and motivate, guide and support JIIT students to become technology entrepreneurs. The centre creates and provides a network of experts to mentor students to elaborate, validate and refine innovative ideas for developing socially useful and commercially viable products and services.

## JUIT, Wagnaghat

### Technology Incubation & Entrepreneurship Development Cell (TIEDC), (JUIT)

TIEDC is supported by the Department of Industries, Himachal Pradesh under Chief Minister's Startup / Innovation Projects / New Industries Scheme. TIEDC works to harness the talents and research strengths available in different engineering disciplines and apply the same to socially relevant projects in the form of Startup Ventures. It provides mentoring and technological guidance to the prospective entrepreneurs.

# Foreign Collaborations/MOUs

The Jaypee Universities(JIIT, JUIT & JUET) have collaborations/ understandings with foreign universities, aimed at academic development and exchange, in mutual areas of interest.

These are listed below:

1. University of Florida, International Center, Gainesville, Florida, USA. The selected students have options to do their 8th semester at a nominal fee at University of Florida & Nebraska, USA. Most of such students have also got admissions in respective MS program and placement in US.
2. College of Information Science & Technology, The Peter Kiewit Institute of Information Science, Engineering & Technology, University of Nebraska, Omaha.
3. South Dakota School of Mines & Technology, USA
4. Youth Development Fund, Bhutan
5. Alliance of 4 Universities (A-4A) of Spain
6. University of Malta

# Vision and Mission and Program Education Objectives

## JIIT

### VISION

To become a Center of Excellence in the field of IT & related emerging areas education, training and research comparable to the best in the world for producing professionals who shall be leaders in innovation, entrepreneurship, creativity and management.

### MISSION

- To develop as a benchmark University in emerging technologies.
- To provide state of the art teaching learning process and R&D environment.
- To harness human capital for sustainable competitive edge and social relevance

## CSE & IT

### VISION

To be a centre of excellence for providing quality education and carrying out cutting edge research to develop future leaders in all aspects of computing, IT and entrepreneurship.

### MISSION

- MISSION 1:** To offer academic programme with state of art curriculum having flexibility for accommodating the latest developments in the areas of computer science and IT
- MISSION 2:** To conduct research and development activities in contemporary and emerging areas of computer science & engineering and IT.
- MISSION 3:** To inculcate IT & entrepreneurial skills to produce professionals capable of providing socially relevant and sustainable solutions.

### PEO

#### B.TECH IN CSE

- PEO 1:** To provide core theoretical and practical knowledge in the domain of Computer Science & Engineering for leading successful career in industries, pursuing higher studies or entrepreneurial endeavors.

- PEO 2:** To develop the ability to critically think, analyze and make decisions for offering techno-commercially feasible and socially acceptable solutions to real life problems in the areas of computing.

- PEO 3:** To imbibe lifelong learning, professional and ethical attitude for embracing global challenges and make positive impact on environment and society.

#### B.TECH IN IT

- PEO 1:** To impart core theoretical and practical knowledge of Computer Science & Engineering and emerging Information Technologies for leading successful career in industries, pursuing higher studies or entrepreneurial endeavours.

- PEO 2:** To develop the ability to critically think, analyze, design and develop IT based solutions.

- PEO 3:** To imbibe the life-long learning and understanding of ethical values, their duties toward environmental issues and sensitize them toward their social responsibility as IT professional.

#### M.TECH IN CSE

- PEO 1:** To prepare professionals who will have successful career in industries, academia, research and entrepreneurial endeavours.

- PEO 2:** To prepare graduates who will demonstrate analytical, research, design and implementation skills offering techno-commercially feasible and socially acceptable solutions to real life problems.

- PEO 3:** To prepare graduates who will thrive to pursue life-long learning and contribute to society as an ethical and responsible citizen.

## ECE

### VISION

To be a centre of excellence in education, training and research in Electronics and Communication Engineering to cultivate technically competent professionals for Industry, Academia and Society.

### MISSION

- MISSION 1:** To impart education through contemporary, futuristic and flexible

curricula with innovative teaching learning methods and hands on training with well equipped Labs.

**MISSION 2:** To carry out cutting edge research in different areas of Electronics and Communication Engineering.

**MISSION 3:** To inculcate technical and entrepreneurial skills in professionals to provide socially relevant and sustainable solutions.

## PEO

### B.TECH IN ECE

**PEO 1:** To provide strong foundation in Electronics and Communication Engineering to pursue professional career, entrepreneurship and higher studies.

**PEO 2:** To evolve capability to analyze, design and develop feasible solutions to real world problems.

**PEO 3:** To inculcate professional ethics, managerial and communication skills to develop ingenious solutions for the benefit of society and environment.

### M.TECH. IN ECE

**PEO 1:** To provide strong foundation in Electronics and Communication Engineering to pursue professional career, entrepreneurship and higher studies.

**PEO 2:** To evolve capability to analyze, design and develop feasible solutions to real world problems.

**PEO 3:** To inculcate professional ethics, managerial and communication skills to develop ingenious solutions for benefit of society and environment.

## BIOTECHNOLOGY

### VISION

To be a centre of excellence in Biotechnology for providing quality education and carrying out cutting edge research to produce professionals, innovators, researchers and entrepreneurs.

### MISSION

**MISSION 1:** To offer contemporary, futuristic and flexible curricula of Biotechnology for teaching and training.

**MISSION 2:** To carry out globally acceptable cutting edge research through sponsored projects and to provide state of art laboratories for experimental work.

**MISSION 3:** To develop bio safe, socially ethically and environmentally acceptable solutions to address health, environmental, industrial, entrepreneurial and societal concerns

## PEO

### B.TECH IN BT

**PEO 1:** To provide fundamental and practical knowledge in the field of Biotechnology for pursuing research career in industry and academia.

**PEO 2:** To impart analytical and research skills and nurture entrepreneurial endeavours.

**PEO 3:** To develop biotechnologists with professional ethics to address global and societal issues for sustainable development

### M.TECH IN BT

**PEO 1:** To impart advanced theoretical and practical knowledge in Biotechnology and allied fields.

**PEO 2:** To provide domain knowledge and expertise for successful career in academics, research and industry.

**PEO 3:** To develop ethically and socially responsible professionals with leadership and entrepreneurship skills

### M.SC IN MICROBIOLOGY

**PEO 1:** To impart advanced theoretical and practical knowledge in Microbiology and allied fields of Biotechnology.

**PEO 2:** To enhance knowledge and expertise for a successful career in academics, research and industry.

**PEO 3:** To develop professionals with social, environmental and ethical awareness

## PMSE

### VISION

To be a centre of excellence in teaching and research in Physics and Materials Science and Engineering.

### MISSION

**MISSION 1:** To offer academic programs and courses in the areas of Physics and Materials Science for nurturing manpower with analytical and independent thinking and scientific temperament.

**MISSION 2:** To conduct fundamental and applied research in emerging areas of Physics and Materials Science.

**MISSION 3:** To foster interaction and collaboration with national and international bodies and institutions for enrichment, application and transfer of knowledge in Physics and Materials Science

## PEO

### M.SC IN PHYSICS

**PEO 1:** To impart advanced theoretical and practical knowledge in the areas of Physics

**PEO 2:** To provide training and expertise to achieve career goals in academics, research and related industry.

## MATHEMATICS

### VISION

To be a centre of excellence in teaching and research in basic and applied areas of Mathematics.

### MISSION

**MISSION 1:** To offer academic programs and courses in contemporary and emerging areas of Mathematics and its applications to develop analytical and problem solving skills.

**MISSION 2:** To carryout quality research in emerging areas of Pure and Applied Mathematics.

**MISSION 3:** To foster interaction with national and international institutions for enrichment, application and dissemination of knowledge in Mathematics.

## PEO

### M.SC IN MATHEMATICS

**PEO 1:** To impart advanced theoretical and computational knowledge in the areas of mathematics

**PEO 2:** To provide training and expertise to achieve career goals in academics, research and related.

## HUMANITIES AND SOCIAL SCIENCES

### VISION

To be a centre of excellence in preparing professionals by imbibing human values and to carryout contemporary and futuristic research in humanities and social sciences.

### MISSION

**MISSION 1:** To provide socially relevant and high quality professional education in a wide range of inter-disciplinary areas of humanities and social sciences.

**MISSION 2:** To conduct quality research in different areas of humanities and social sciences.

**MISSION 3:** To imbibe pluralistic values, democratic and equalitarian doctrines of the society at large.

## JUIT

### VISION

To become a centre of excellence in the field of IT and related emerging areas in education, training and research comparable to the best in the world for producing professionals who shall be leaders in innovation, entrepreneurship, creativity and management.

### MISSION

- To develop as a benchmark University in emerging technologies.
- To provide state of the art teaching-learning process and a stimulating R&D environment.
- To harness human capital for sustainable competitive edge and social relevance.

## CSE & IT

### VISION

To become a Center of Excellence in the Computer Science & Engineering and Information Technology (CSE&IT) discipline with state of art research and teaching environment.

### MISSION

**MISSION 1:** To provide a teaching and learning leading to careers in Computer Science & Engineering and Information Technology.

MISSION 2: To create an environment towards cutting-edge research activities.

MISSION 3 : To harness human capital for the sustainable technologies

## PEO

### B.TECH IN CSE

PEO 1: To enhance professional skills for developing analytical & computational models and technical tools.

PEO 2: To promote self-learning abilities and team management skills.

PEO 3: To sensitize students towards issues of social relevance, openness to other international cultures and to introduce them to professional ethics & practice.

### B.TECH IN IT

PEO 1: To provide a solid technical foundation required for comprehending, analyzing and designing novel products and technologies.

PEO 2: To inculcate the ability to gain multidisciplinary knowledge and to innovate & contribute through the leadership and entrepreneurship skills

PEO 3: To promote awareness towards issues of social relevance and introduce them to professional ethics and practice.

### B.TECH IN ECM

PEO 1: Engage in lifelong learning, communicate effectively and exhibit leadership skills

PEO 2: Pursue higher studies to carry out research and development in evolving technologies

PEO 3: Demonstrate sensitivity towards professional ethics.

### M.TECH IN CSE (INFORMATION SECURITY)

PEO 1: To create professionals who will be handling the real-life problems and challenges in connection to cyber security.

PEO 2: To communicate knowledge pertinent to the current state arts in the field of Information Security.

PEO 3: To apply modern programming techniques, advanced languages, lab equipments, and management tools to resolve the various issues related to Industry standards.

### M.TECH IN CSE (DATA SCIENCE)

PEO 1: To utilize mathematical models and statistical data analysis with necessary engineering to solve real-world problems.

PEO 2: To design storage structures and other appropriate algorithms using data visualization, and machine learning techniques.

PEO 3: To apply artificial statistics and computational analysis for data to predict and represent knowledge.

## BT & BI

### VISION

To produce Biotechnology and Bioinformatics professionals with leadership quality in technology, creativity, innovation, and entrepreneurship.

### MISSION

MISSION 1: The outcome-based teaching/learning practices to harness human capital for sustainable competitive edge and social relevance

MISSION 2: To develop a research-based education model in Biotechnology & Bioinformatics

MISSION 3: To produce professionals capable of working in industry/Govt. organizations or as entrepreneur.

## PEO

### B.TECH IN BIOTECHNOLOGY

PEO 1: To provide basic and advance knowledge in biotechnology and related disciplines for achieving advancements in academia and industry

PEO 2: To inculcate analytical, research skills and entrepreneurial endeavours to develop innovative products/processes for the societal benefits

PEO 3: To develop team spirit and ethical behaviour for working successfully in industry, academia, and government organizations.

### B.TECH IN BIOINFORMATICS

PEO 1: Enrich knowledge in Bioinformatics domain to integrate techniques across disciplinary boundaries.

PEO-2: Enable to identify, analyze and solve real world problems with skills and novelty in computational biology.

PEO-3: Inculcate spirit of teamwork, constructive thinking, ethical behaviour and professionalism.

### **M.TECH IN BIOTECHNOLOGY**

PEO 1: To impart basic and advance knowledge in various domains of Biotechnology.

PEO 2: To impart the laboratory skills to cater the needs of industries and high-end research.

PEO 3: To inculcate team work with ethics to solve scientific problems using multidisciplinary approaches.

### **M.TECH IN BIOTECHNOLOGY (INDUSTRIAL BIOTECHNOLOGY)**

PEO 1: To inculcate basic and advance understanding in the emerging areas of Industrial Biotechnology

PEO 2: To impart advanced laboratory skills to cater the relevant industrial needs of this sector

PEO 3: To develop professionals with ethics and entrepreneurship skills to solve problems

### **M.TECH IN BIOTECHNOLOGY (MEDICAL BIOTECHNOLOGY)**

PEO 1: To impart basic and applied knowledge in the growing areas of Medical Biotechnology

PEO 2: To impart advanced laboratory skills to cater the biopharmaceutical companies

PEO 3: To develop expertise in identification of problems in medical science leading to sustainable solutions using multi domain knowledge

### **M.SC IN BIOTECHNOLOGY**

PEO 1: To impart fundamental and applied knowledge across domains of Biotechnology.

PEO 2: To inculcate skills for problem identification and sustainable solutions involving biotechnological interventions.

PEO 3: To educate students in biotechnology for entrepreneurship and industrial applications.

### **M.SC IN MICROBIOLOGY**

PEO 1: To impart advanced theoretical and practical knowledge across domains of Microbiology

PEO 2: To enhance knowledge and skills for a successful career in industry and academics

PEO 3: To develop trained professionals with ethics and entrepreneurship skills for providing sustainable solutions

## **CIVIL ENGINEERING**

### **VISION**

To strive for excellence, knowledge creation and research contribution to the field of Civil Engineering, and to serve the society and the nation with missionary zeal, thus to be recognized internationally as one of the best centres of research and education in all the areas of Civil Engineering.

### **MISSION**

MISSION 1: To provide a vibrant educational environment in the competitive field of Civil Engineering keeping in view the emerging infrastructural needs of the country.

MISSION 2: To keep pace with the advances in Civil Engineering techniques and technologies to provide training and skills for creative, innovative and ethical attitude.

MISSION 3: To provide state-of-the-art skills and knowledge to the students to become leaders in the world of Civil Engineering.

### **PEO**

#### **B.TECH IN CE**

PEO 1: To utilize appropriate theoretical, modelling concepts and communication skills in dealing with real life engineering problems

PEO 2: To advocate the principle of self-learning and utilization of integrated knowledge through industrial and research training for benefitting the society effectively..

PEO 3: To conceptualize, develop and complete large scale projects within the time frame along with adaptability to other international cultures within professional ethos and ethics.

#### **M.TECH IN CE (STRUCTURAL ENGINEERING)**

PEO 1: To utilize appropriate theoretical, practical and modeling concepts in dealing with real-life structural engineering problems, finding their effective solutions.

**PEO 2:** To enable the students to apply latest design codes to solve complex problems and to motivate them in interdisciplinary research related to Structural Engineering.

**PEO 3:** To familiarize the graduate students to high value research related to Structural Engineering and to motivate them in interdisciplinary involvement.

### **M.TECH IN CE (ENVIRONMENTAL ENGINEERING)**

**PEO 1:** To enable the students to undertake safe, economical and updated design principles for solving complex environment related problems.

**PEO 2:** To acquire the analytical ability to analyze, formulate, and solve problems in the field of Environmental Engineering.

**PEO 3:** To provide theoretical and practical knowledge of Environment Engineering, managerial and entrepreneurial skills to enable students to contribute to the well-being of society with a global outlook.

### **M.TECH IN CE (CONSTRUCTION MANAGEMENT)**

**PEO 1:** Graduates of the programme will become effectively as construction engineers and managers in government, industry, or other organizations; designing, improving, and implementing efficient engineering practices.

**PEO 2:** To provide solutions to construction engineering and management problems that account for economical, societal, ethical by applying acquired engineering knowledge.

**PEO 3:** To impart training to the students to gain capabilities to work effectively with multi-domain professional teams in collaboration and exhibit strong leadership quality, communication and interpersonal skills in the profession

## **ECE**

### **VISION**

To be a creative driving force, within the university and worldwide, of the highest scholarly and entrepreneurial quality

### **MISSION**

**MISSION 1:** To provide globally comparable teaching and learning environment through theoretical and practical knowledge.

**MISSION 2:** To promote through establishment of research centres of excellence

in niche technological areas to nurture the spirit of innovation and creativity.

**MISSION 3:** To produce professionals capable to work in a team or individual to tackle the rapidly changing requirement of the society.

## **PEO**

### **B.TECH IN ECE**

**PEO 1:** To provide research intensive industry aligned curricula.

**PEO 2:** To identify and solve complex engineering problems by applying principles of engineering, science, and mathematics.

**PEO 3:** To inculcate ethical and professional responsibilities to apply their knowledge to excel in the competitive world.

### **M.TECH IN ECE (INTERNET OF THINGS)**

**PEO 1:** To accomplish the requirement of specialized technical knowledge in the emerging field of IoT to support the latest technology and infrastructure development.

**PEO 2:** To produce the trained professionals to serve academics, research, industry, and society.

**PEO 3:** To prepare the professionals to provide the feasible solution for the complex interdisciplinary issues with the help of smart technologies.

## **HUMANITIES AND SOCIAL SCIENCES**

### **VISION**

To be the change-facilitators by imparting professional and behavioral competencies to complement the existing and emerging educational programs of the University and match the Industry Requirements.

### **MISSION**

**MISSION 1:** To facilitate students and professionals to become Innovative, Competitive and Enterprising in their chosen fields.

**MISSION 2:** To create responsible global citizens, who are able to express and assess opinions, take independent decisions and value the power of imagination and continuous learning.

**MISSION 3:** To bridge the gap between academia and industry by incorporating contemporary concepts and practices in our courses.

## MATHEMATICS

### VISION

To produce leaders in technology with excellent analytical skills through mathematics education at global level and training the students in acquiring conceptual understanding of the framework and structure of mathematics, its logical, cognitive and operational processes, and applications

### MISSION

**MISSION 1:** To provide an environment to learn and be competent users of advanced mathematical tools.

**MISSION 2:** To provide solid foundation in mathematics for building up their reasoning and analytical skills.

**MISSION 3:** To produce ethical, motivated and skilled mathematicians to pursue higher studies.

## PMSE

### VISION

Student centered learning and student-faculty research by using a mixture of traditional, current and integrative pedagogical techniques dictated by state of the art education & research in order to create a nationally & internationally recognized

unique model for physics and materials science education in both public and professional spheres.

### MISSION

**MISSION 1:** To promote outcome based education to prepare students for variegated challenges in industry and academia.

**MISSION 2:** To provide a panorama of courses imparting teaching, research and mentoring opportunities for graduate students.

**MISSION 3:** The department is dedicated to provide teaching and encourage collaborative learning in Physics & Materials Science in a performance based active academic environment.

## JUET

### VISION

Playing a pivotal role to enable the country and state of Madhya Pradesh, in particular, in developing high caliber trained manpower in the frontier areas of Technologies.

### MISSION

To make the university a 'Center of Excellence' in the field of Engineering and Technology with highly developed infrastructure, excellent faculty with an international outlook and active interaction with the industry.

## CIVIL ENGINEERING

### VISION

Produce creative and skilled Engineers equipped with advanced technical skills. Continuously strive for excellence in research by exploring new frontiers of knowledge to meet challenges in all disciplines of Civil Engineering.

### MISSION

**MISSION 1:** To graduate the students who are socially aware and interested in working with people to solve problems and meet challenges in the Civil Engineering domain.

**MISSION 2 :** To make them confidently enter in the world of the Civil Engineering profession through systematic teaching methodology and research.

## PEO

### B.TECH IN CE

- PEO 1:** To actively engage in problem-solving using Engineering principles to deal with the growing needs of the society.
- PEO 2:** To be able to succeed in positions in civil Engineering practice or research, and in other fields, they choose to pursue and enroll in advanced studies.
- PEO 3:** To develop the professional attitude and ethical competencies, so that the students would be able to face the work-life and personal challenges with utmost grace, and make positive impact on the environment and society.

### M.TECH IN STRUCTURAL ENGINEERING

- PEO 1:** To enunciate, analyze, design, and solve real-world problems in Structural Engineering; and identify and develop the suitable modern engineering tools for the same.
- PEO 2:** To equip the students with sound technical, managerial and professional skills in core and allied areas for on-the-spot employability in the industry.
- PEO 3:** To develop multidisciplinary approach and harmonize engineering research concepts to social and humanitarian cause through the development of strong ethical values and practices.

### M.TECH IN CONSTRUCTION MANAGEMENT

- PEO 1:** Identify and apply sustainable, alternative and cost effective construction materials and practices.
- PEO 2:** Apply systems, methods, procedures, modern tools and techniques in construction projects.
- PEO 3:** Work in team environment and apply tools to optimise resources for achieving project objectives.

### M.TECH IN ENVIRONMENTAL ENGINEERING

- PEO 1:** Graduates of the programme will become effectively as environmental engineers in government, industry, or other organizations; designing, improving, and implementing efficient environmental engineering practices that is sustainable.
- PEO 2:** Graduates of the programme will provide solutions to environmental engineering problems that account for economical, societal, ethical, as

well as with standards both as individuals and in team environments, by applying acquired engineering knowledge.

- PEO 3:** The programme will continue their lifelong learning to remain effective professionals to maintain and enhance technical and professional growth.

## CSE

### VISION

Transforming students to become the New-age, Innovating, Competitive and Enterprising leaders in their chosen professions of service and technology.

### MISSION

- MISSION 1:** To serve as a 'Centre of learning' dedicated to disseminate knowledge pertaining to Technical skills in the field of Computer Science and Information Technology among students.
- MISSION 2:** To conduct innovation, research and development activities in contemporary and emerging areas of computer science & engineering and IT.
- MISSION 3 :** To inculcate Information Technology & entrepreneurial skills to produce professionals capable of providing socially relevant and sustainable solutions.

## PEO

### B.TECH IN CSE

- PEO 1:** To provide core theoretical knowledge and practical exposure in the area of Computer Science & Engineering to help students excel in their professional career, pursuit of higher studies, or their entrepreneurial endeavours.
- PEO 2:** To enable the students to use existing knowledge and create the new knowledge using multiple disciplines in solving real-life problems.
- PEO 3:** To develop the professional attitude and ethical competencies, so that the students would be able to face the work-life and personal challenges with utmost grace, and make positive impact on the environment and society.

### M.TECH IN CSE

- PEO 1:** Practice with an expertise in academics, entrepreneurship, design and development in computing technology, or research in a specialized area of computer science and Engineering to pursue higher studies.

**PEO 2:** Exhibit analytical, decision making and problem-solving skills by applying research principles for handling real life problems with realistic constraints.

**PEO 3:** Ability to communicate the findings or express innovative ideas in an effective manner with an awareness of professional, social and ethical responsibilities

## **ECE**

### **VISION**

To develop technically skilled man power to take up challenges of industries in field of communication, information technology, electronic system design and undertake research on front areas to address societal needs which support the economic growth of the country.

### **MISSION**

**MISSION 1:** Develop teaching methodologies to inculcate innovation and skills among the students.

**MISSION 2:** Encourage faculty to take part in research and collaboration with other University and Industry professionals, and create knowledge for the future technologies.

## **PEO**

### **B.TECH IN ECE**

**PEO 1:** Provide graduates with a strong foundation in mathematics, science and engineering fundamentals to enable them to devise and deliver efficient solutions to challenging problems in Electronics, Communications and allied disciplines.

**PEO 2:** Provide sound theoretical and practical knowledge of E&C Engineering, managerial and entrepreneurial skills to enable students to contribute to the well being of society with a global outlook.

**PEO 3:** Inculcate qualities of teamwork as well as social, interpersonal and leadership skills and an ability to adapt to evolving professional environments in the domains of engineering and technology.

### **M.TECH IN ECE**

**PEO 1:** To provide profound knowledge of modern design tools to solve real-life problems in the field of Electronics and Communication Engineering.

**PEO 2:** To inculcate research skills with ethical attributes for academia and industry.

**PEO 3:** To develop entrepreneurial skills as per industry requirements for providing sustainable solutions to the society.

## **MECHANICAL ENGINEERING**

### **VISION**

To cultivate, nurture and empower the young minds with the knowledge, skill set, values and attitude to solve problems at the grassroots level of the society, thus to be recognized internationally as one of the finest centers of excellence in various aspects of Mechanical Engineering.

### **MISSION**

**MISSION 1:** Prepare students for careers in industry, academia and government organization in mechanical and allied engineering.

**MISSION 2:** Perform mechanical engineering based research and other scholarly activities.

**MISSION 3:** Interact with industry and government establishments and provide them technical knowledge and support.

## **PEO**

### **B.TECH IN ME**

**PEO 1:** Create awareness about the multitude of applications of Mechanical Engineering in improving the quality of life.

**PEO 2:** Develop fundamental understanding and skill-set to use basic concepts derived through the laws of nature.

**PEO 3:** Provide conventional as well as IT enabled environment to foster learning , research, innovation and entrepreneurship.

### **M.TECH IN ME (MANUFACTURING TECHNOLOGY)**

**PEO 1:** Create a congenial milieu for the scholars that impart ability to work with multi- disciplinary groups in professional, industry and research organizations.

**PEO 2:** Provide guidance to the students for the selection of their research problems and professional career outlook.

**PEO 3:** Ability to promote the design of manufacturable products, apply the new competent manufacturing processes and improve the performance of existing processes.

## CHEMICAL ENGINEERING

### VISION

To produce graduate engineers capable of contributing to the requirements of the industry and conducting research & consultancy to meet global standards as well as the aspirations of the scientific community.

### MISSION

**MISSION 1:** Impart quality education in chemical engineering and allied areas.

**MISSION 2:** Foster research and development activities among faculty and students in order to serve the needs of society.

### PEO

#### B.TECH IN CHEMICAL ENGINEERING

**PEO 1:** To produce graduate chemical engineers capable of meeting current and future challenges of chemical industries by providing them excellent infrastructure and facilities.

**PEO 2:** To equip graduates with the sound knowledge of chemical engineering fundamentals to formulate, analyze chemical engineering and related problems so that these graduates are capable of handling multifaceted problems.

**PEO 3:** To inculcate ethical practices in the graduates and basic concepts of intellectual skills, courage, integrity, awareness and sensitivity to the needs and aspirations of the society

#### M.TECH IN CHEMICAL ENGINEERING

**PEO 1:** To enable students conduct applied scientific research in various fields of chemical engineering.

**PEO 2:** Exhibit necessary skills, knowledge and deep understanding to deal industrial problems with a scientific outlook.

**PEO 3:** Ability to communicate clearly and concisely the research findings with the scientific community by adhering to the social and professional ethics.

## CHEMISTRY

### VISION

To nurture the young minds with strong understanding of chemistry to fulfill the dreams of Society and Nation.

### MISSION

To inculcate fundamental skills by excellent teaching with a view to provide quality workforce to Industry

## HUMANITIES AND SOCIAL SCIENCES

### VISION

To be a center of excellence for overall development of students by grooming, nurturing and inculcating universal human values and to carry out quality research.

### MISSION

**MISSION 1:** To provide socially relevant and high-quality professional education in a wide range of inter-disciplinary areas of humanities and social sciences to all the students.

**MISSION 2:** To conduct quality research in different areas of humanities and social sciences.

**MISSION 3:** To imbibe universal human values and ethical doctrines of the society at large in the students

## MATHEMATICS

### VISION

To produce leaders with excellent analytical skills through mathematics education and training the students in acquiring conceptual understanding of mathematics, its logical, cognitive and operational processes, and applications.

### MISSION

**MISSION 1:** To strive by introducing the students to main ideas and methods of Mathematics for building up their reasoning and analytical skills.

**MISSION 2:** To provide quality Mathematics course work which supports and enhances the capability and competence in assimilating, dissecting and distilling information for various applications.

# Training and Placement

## JIIT-Noida, JUIT-Waknaghat & JUET-Guna

Over the years, Jaypee Universities have built a strong network with leading companies for recruiting their engineering graduates.

The Training and Placement Cell at JIIT, Noida centrally handles campus placement of the graduating students of all our campuses, namely JIIT Noida, JUIT Waknaghat, JUET Guna and Jaypee University Anoopshahr. The Cell provides complete support to the visiting companies at every stage of placement process. Arrangements for Pre-placement Talks, online/written tests, group discussions and interviews are made as per the requirement of the visiting companies.

It gives us tremendous satisfaction that our Placements are improving year by year and likely to improve further in the years to come. The highest salary package offered, till now for 2021 batch, is INR 30 LPA to 10 students by Amazon. Morgan Stanley has offered a salary package of INR 25 LPA to 5 students. Companies like Google, Morgan Stanley, Deloitte, Nestle, SAP Labs, Intuit, BNY Mellon, ZS Associates visited the campus for 2021 batch and recruited students. During the current placement season, 39 other companies have offered salary package of INR 6 LPA & above to 332 students.

# Students Club

In addition to academic pursuits, extracurricular activities make up a valuable part of the University experience. The students can develop their social and interpersonal skills by participating in various student hubs. These help students acquire traits like team work, sportsmanship and leadership. These clubs are operated by students under a Faculty Member and they organize events of multifarious dimensions which keeps the Campus vibrant.

## Clubs at JIIT

### Creativity and Innovation Cell in Electronics

**CEF**– Student Society

# Service to the Society

## National Service Scheme (NSS) (JIIT)

JIIT believes in developing students' consciousness and well-being by giving back to society through social outreach and community service along with scholarly education. For this cause, it has set up National Service Scheme, popularly known as NSS, which is a permanent youth programme under the Ministry of Youth Affairs and Sports, Government of India and funded by Government of Tamil Nadu and Government of India in the ratio 5:7. Three NSS units of 100 students each have been sanctioned, of which one unit has been set up in Sector 62 and another in Sector 128. Currently, there are approximately 400 NSS student volunteers actively engaged in social service.

NSS-JIIT takes pride in three key initiatives. These three initiatives are: a) Education and awareness drives b) Say no to Plastic and c) Waste and Disaster Management. All activities, tasks, drives, and campaigns revolve around it. NSS JIIT organizes education camps, blood donation camps, food distribution camps, disaster donation drives, to name a few through NSS. JIIT conduct awareness campaigns, offer sustainable solutions for holistic development, conduct activities for environment, hygiene and cleanliness and educate individuals at every level. NSS JIIT promotes national missions such as Sarv Shiksha Abhiyan, Swachh Bharat, Fit India Movement, Digital India etc. It has associations with major NGOs of Delhi NCR such as Udayan Care, Sewa India Group, Robin Hood Army, Vegan Outreach, Rotary Club, Grace Care Home, Saikripa Foundation etc. Volunteers visit these NGOs and render their services.

## Unnat Bharat Abhiyan (UBA) (JIIT)

Jaypee Institute of Information Technology, Noida is an active member of Unnat Bharat Abhiyan, a flagship programme of Ministry of Human Resource Development (MHRD), Govt. of India. Institute has adopted five villages from Gautam Budh Nagar, Uttar Pradesh under this program.

Motivation by the vision of Gandhi ji of self-sufficient 'village republics', Govt. of India has set its vision of holistic development of villages.

Under this vision, rural areas need to be developed with local resources (both material and manpower), eco-friendly technologies so that the basic need of food, clothing, shelter, sanitation, health care, energy, livelihood, education etc. are locally met. The main aim of Unnat Bharat Abhiyan is to enable faculty and students of the institution to work with the people of rural India in identifying development challenges and evolving appropriate solutions for accelerating sustainable growth of adopted villages.

The primarily objective of JIIT is to develop linkage with selected rural clusters, to get involved in the planning process and to promote the requisite science and technology interventions to improvise and expedite the developmental efforts in these clusters.

In this regard, JIIT understood the needs of selected villages and exploring the possibilities of customizing existing technologies as per the local needs.

## Unnat Bharat Abhiyan (UBA) (JUIT)

Unnat Bharat Abhiyan is a flagship program of MHRD (Govt. of India) and its main mission is to enable higher educational institutions to work with the people of rural India in identifying development challenges and evolving appropriate solutions for accelerating sustainable growth. Jaypee University of Information Technology (JUIT), Waknaghat is an active participating Institute for UBA. Five villages in vicinity of University campus of district Solan have been adopted for enhancement of their standards of living, better environment for education and living. A team of students and teachers organize various activities at villages for rural development. The main focus of these programs is to identify the issues related with day to day activities in hilly villages and try to solve these problems with sustainable solutions. The UBA team promotes various government schemes in adopted villages. As a part of UBA team, students learn team skills, discipline, collaboration and social and cultural etiquettes. UBA team of JUIT organized various events in these villages including computer literacy programme, awareness rally against Drug abuse, Analysis of drinking water, participation in Gram Sabha, Biogas plant awareness and Plastic free campaign.

## National Cadet Corps (NCC) (JUIT)

The JUIT Waknaghat has introduced NCC Senior Wing for both Girls and Boys. For Girls this was started w.e.f Academic Session 2018 with a capacity of 80 cadets. For

Boys it commenced w.e.f 2019 with a capacity of 80 cadets. Volunteer students can apply for NCC during their first year. The selection is carried out by H.P Battalion NCC ,Solon based on practical test and interviews at university campus. Participation by students in NCC enhances their personality and gives them an edge during placements and job interviews also.

### Fit India campaign (JUIT)

Incidences of various lifestyle diseases (e.g. diabetes, hypertension etc.) are increasing in India, even in the children. Small lifestyle changes by including fitness in the daily routine could help in the prevention of these diseases and help people of India to live a healthy and prosper life. Keeping this in mind, The Prime Minister of India launched the Fit India Movement on 29th August 2019. He insisted that the people of India should adopt fitness in their lifestyle. The vision of Fit India Movement is that “All students and staff of Higher Education Institutions to have physical fitness, mental fitness, along with social, emotional and intellectual well being”.

Jaypee University of Information Technology (JUIT), Solan, Himachal Pradesh is an active member of Fit India Movement. The JUIT has constituted a Fit India Campaign club and prepared a schematic plan for various activities to be conducted as a part of this movement, as per instructions of the Ministry of Human Resource Development. The objectives/mission of the movement are being achieved by organizing various activities that include the constitution of a fitness club, fitness campaign activities, devoting a daily/regular fitness activity hours and various seminars/webinars on the related theme for the students and staff.

### Swachh Bharat Abhiyan (SBA) (JIIT)

Swachh Bharat Abhiyan has been launched by Ministry of Human Resource Development to meet the objectives of the movement ‘Swachh Bharat Mission’ which was launched on October 2nd, 2014. JIIT is also a part of this movement. The institute participates in various activities suggested by MHRD i.e Swachh Bharat Summer Internship Program, Swachhata Hi Sewa Campaign etc. The students of JIIT Noida are involved in Information-Education-Communication activities, Solid Waste Management related activities under Swachh Bharat Abhiyan

# Jaiprakash Sewa Sansthan

The Group has always believed in “growth with a humane face” and to fulfill its obligations it has set up Jaiprakash Sewa Sansthan (JSS), a ‘not-for-profit’ trust which primarily serves the objectives of socio-economic development, reducing the pain and distress in society.

For over five decades now, Jaypee Group has supported the socio-economic development of the local environment in which it operates and has ensured that the economically and educationally challenged strata around the work surroundings are also benefited from the Group’s growth by providing education, medical and other facilities for local development.

The Group also undertakes Comprehensive Rural Development Programme (CRDP) which covers a wide range of projects such as free medical camps, health check-ups for village school children, literacy campaigns like Balwadis for young boys and girls, safe drinking water supply, creating huge water reservoirs in villages, self employment which includes tailoring classes for women and animal husbandry. Some other important activities undertaken include the renovation of old temples, schools and hospital buildings in the adjoining adopted villages.

JSS has translated its social responsibility into reality by building schools and training institutes that cater to the needs of providing quality education to the rural masses. The Trust also helps in times of natural catastrophe to the affected communities in distress.

# The Jaypee Group

**Engineering & Construction, Cement, Power, Real Estate, Expressways, Fertilizer, Hospitality, Healthcare, Education (not-for-profit)**

The Jaypee Group is an infrastructure conglomerate with a strong belief in the country's huge potential.
